Rescue workers at Dallas-Fort Worth International Airport cover victims of the Delta Airlines jet crash in which 132 people were killed. The cause of the crash has not been determined, but federal investigators sus-

pect a phenomenon known as wind shear, or micro-

bursts. This occurs when a powerful downdraft at low altitudes creates winds blowing in opposite directions. A pilot who adjusts the controls of the aircraft to compensate for a strong headwind can crash when the wind shifts on the other side of the downdraft.

Jet Crash Near Dallas Kills 132; Wind Shear Is Suspected

THE UNIVERSITY OF SOMEAN!

GRAPEVINE, Texas - A Delta Airlines jet with 162 people aboard crashed and exploded in a fireball bring a thunderstorm as it tried to land at Dallas-Fort Worth International Airport. The crash killed 131 people aboard the plane and one on the ground.

Federal investigators focused on wind shear, an abrupt change in wind direction or speed, as the most probable cause of the crash

At least 28 passengers and three crew members aboard the plane, a three-engine, wide-body Lockheed L-1011 Tristar, survived, Most survivors had been seated in the back of the plane, which broke away from the rest of the fuscings.

By Sunday morning, only 19 of the 121 bodies recovered from the cash had been identified, said Dr.

enough to avert a crash. James W. Wilson, a scientist who specializes in the study of wind shear at the center in Boulder, said the wind shear detection systems at most of the nation's airports were inadequate, including the one at Dallas-Fort Worth.

The systems consist of six to 12 wind sensors placed at ground level speed and direction of the wind. The systems detect only wind shear close to ground level, and the wind shear can slip between them.

Mr. Bursley of the safety board said Saturday that at the Dallasall directions. A plane moving into Fort Worth airport, only one of six this formation at low level will en- sensors, at the center of the airport, Therefore any unusual wind di- longer afford the expense.

structed by other means, such as by reports from other planes, investi-

It could not be learned immediately why only one sensor was equipped to record.

In July 1984, the National Center for Atmospheric Research tested another system of detecting wind shear that used radar to detect abrupt changes in wind speed. The system, using Doppler radar, was put into place around Stapleton Airport in Denver and was tested that summer. Mr. Wilson and officials at the

Federal Aviation Administration, which paid \$308,000 to finance the test, said the Doppler system was able to predict 17 minutes in advance where a wind shear was going to occur. Mr. Wilson said, "It was tremendously successful."

However, the FAA cut off money for the system this summer becrise, officials said, it could no

Black Miners In South Africa Threaten Strike

By Alan Cowell New York Times Service

JOHANNESBURG - South Africa's principal black mine workers union announced Sunday that it would call a strike for higher wages Aug. 25 at gold, diamond and coal mines. It also threatened further protests unless the authorities called off the country's state of

150,000 of South Africa's 550,000 black mine workers and regarded as the country's strongest black labor group, also said it would call a national mine strike if President Pieter W. Botha carried out threats to repatriate foreign black workers in reprisal for international sanctions against the country.

There was no immediate response from employers or from the

Cyril Ramaphosa, general secretary of the union, the National Union of Mineworkers, said in Johannesburg that if the work stoppage took place it could affect mines that yield 70 percent of South Africa's gold production.

Gold accounts for half of the country's foreign exchange earnings, and taxes on gold mining companies last year provided one-tenth of official revenues. More than 400,000 of the black mine workers are employed on gold

The threat of a pay strike appeared designed to pressure employers into increasing raises of 19.1 percent for the lowest-paid black mine workers and of 14 percent for others. The union has demanded 22 percent for all its members, along with a say in scrapping laws that reserve the most lucrative mine jobs for whites.

The union's other demands, however, seemed to go beyond economic issues and to present an often-predicted political challenge to Mr. Botha from the increasingly militant miners union.

Moreover, the challenge coincided with the country's werst spasm of racial unrest in years.

province. Police said Sunday that 1,412 people had been detained since the emergency began and that 114 of those had been released, leaving 1,298 still in detention. In isolated incidents of unrest. the police said that a 39-year-old black woman had been dragged

Head-On Train Crash Kills 32 in Southern France

An express from Paris carrying vacationers collided at high speed Saturday with a local train on a single track near the station at Flaujac, 95 miles southeast of Bordeaux. Fifty-eight persons were hospitalized in serious condition. Local officials said the crash may have resulted from confusion over timetables. The express, which operates weekly in vacation periods, was running late on a track usually free of other trains.

Some of the agents of Iran's leader, the Ayatollah Ruhollah Khomeni, operate under the aegis of the Iran Air Force Logistics Support Center (Europe), and work out of a London office that also houses the National Iranian Oil Co.

They have sought to buy, steal and smuggle American-made weapons, spare parts and supplies to repair sophisticated U.S. equipment purchased by the shah of Iran before he was overthrown in 1979. These weapons have been severely depleted by the five-year war with

The United States imposed a total arms embargo during the 1979-80 crisis when Americans were held hostage in Iran. And even though hundreds of shipments have got through to Tehran, administration officials say the smuggling opera-tions have filled only about 10 percent of Iran's requirement for

obstacles and appeals.

In the last year, Palestinians have killed at least 11 Israelis, either kidnapping them in remote areas of Israel close to the West Bank boundary or shooting them in crowded streets of West Bank towns. The two most recent incidents, in which three Israelis were killed, have

Soviet Orders Economic Reforms

MOSCOW (AP) — The Communist Party initiated some of the economic changes mandated by the Soviet leader, Mikhail S. Gorbachev, with a decree published Sunday in Pravda ordering new price incentives, industrial building policies and wider powers for local decision making. The decree, issued by the party's Central Committee and the Council of Ministers, set down changes in the role of the powerful state planning commission. It said government bodies charged with maintaining product quality must take more responsibility, and ordered a system of incentives and fines to be applied initially to factories producing high-technology machinery. technology machinery.
In June, Mr. Gorbachev said in a speech that the centralized economy

should be more responsive to demand, manufacturing quality should be improved and obsolete factories rebuilt, and local managers should have

Uganda Says Leader Met Guerrillas

KAMPALA, Uganda (UPI) — Ugandan radio said Sunday that Prime Minister Paulo Mirwanga told diplomats that he had met representatives of guerrillas who fought the previous regime, in talks aimed at forming a broad-based interim government. The guerrillas denied the assertion.

Mr. Muwanga, who was sworn in Thursday after a military coup overthrew President Milton Obote on July 27, reportedly told the diplomats that a consensus had been reached in talks with Uganda's main political parties and the National Resistance Army on prospective

In Nairobi, a spokesman for the guerrillas, Matthew Rukikaire, denied that members of the resistance had met Mr. Muwanga, and he rejected the claim of consensus. The cabinet under Mr. Muwanga is to administer Uganda until elections, which the ruling military council has promised will be held in a year.

Bolivian Forms Presidential Majority

LA PAZ (AP) — Victor Paz Estenssoro won a pledge of support from his chief leftist rival Sunday that appeared to assure his election in

Congress as Bolivia's next president.

Hugo Banzer Suárez, who ruled Bolivia as an army general from 1971 to 1978, won 28.5 percent of the popular vote in July 16 elections to 26.4 percent for Mr. Paz Estenssoro. Another 16 candidates shared the rest of he vote, and the constitution requires the Senate and Chamber of Deputies to jointly choose the president from the top vote-getters if no

candidate wins at least 50 percent of the votes.

The Revolutionary Nationalist Movement party of Mr. Paz Estensson, 77, won 59 of the 157 congressional scats in the July elections. Before Sunday's session, he had obtained pledges of another 13 votes. On Sunday he was promised 16 votes, enough for a majority, by the Leftist Revolutionary Movement, which finished third in the popular vote.

Managua Official to End Anti-U.S. Fast

MANAGUA (UPI) — Aides to Foreign Minister Miguel D'Escoto Brockmann of Nicaragua said Sunday that in two days he would end a month of fasting, which he undertook to protest U.S. policies against the

Sandinist government.

Father D'Escoto, a Roman Catholic priest, reportedly made his decision after his doctor warned that the fast had reached a point where it was dangering his life.

The foreign minister weighs 172 pounds (78 kilograms). He weighed 205 pounds when he started fasting.

Turkey to Ask Revisions In U.S. Aid Agreements

By Henry Kamm

New York Times Service ANKARA - Turkey wants more U.S. military aid and will seek fundamental revisions in the mili-tary and economic cooperation agreement expiring in December, according to senior officials and military officers directly involved. Under the five-year agreement,

the United States operates from several military, intelligence-gathering and communications bases, and stations 6,000 to 7,000 troops in Turkey.

The Turkish government believes that the Reagan administration fails each year to request the amount needed for a costly mod-

ernization of Turkey's armed forces, and the U.S. Congress, un-der pressure from Greece, cuts the appropriation even further.
For fiscal 1986, the Reagan administration requested \$939 million in security assistance, of which \$150 million would be economic aid and \$789 million military aid. Congress scaled the military por-

tion down to \$714 million. In the Turkish view, shared in the Pentagon, the modernization objectives for the Turkish military require \$1.2 billion yearly for a de-

The Turkish military is still preparing the request for a new agree-ment, which is to be presented Ozal declined to discuss specific demands. He also would not dis-cuss what Turkey might do if the

United States failed to meet them. Asked to comment, a State Department official familiar with Turkish affairs said in Washington: "None of this is anything new. We've had all sorts of indications that they would like to revise the agreement, but nothing has been

formalized yet.
"The Turics are clearly frustrated," the official said. "There is a degree of dissatisfaction about how the relationship is going. But they not only get a lot of aid, they get it on very favorable terms. The idea that by renegotiating the base agreements, for example, they can get a better deal from Congress is a pipe dream. This is no perfect agreement from our perspective, ei-

ther. If Turkey wants to open it up for changes, we might too."

Mr. Ozal emphasized what he called the complex nature of the issue and Turkey's importance to the Atlantic allience are coly be. the Atlantic alliance, not only be-cause it guards frontiers with the Soviet Union and Bulgaria and the straits from the Black Sea into the Mediterranean, but also because it shares borders with Iran, Iraq and

Syria. Mr. Ozal said Turkey was not treated fairly in comparison with the two top beneficiaries of U.S. military aid, Israel and Egypt, the only countries that receive more than Turkey.

authority in each of the next two years of \$3 billion for Israel and \$2.1 billion for Egypt, in addition to onetime infusions of emergency economic aid of \$1.5 billion for Israel and \$500 million for Egypt. "We are spending a lot for our armed forces," Mr. Ozal said. "This affects our economic develop-

owest in the North Atlantic Treaty

Mr. Ozal said that during his visit to Washington this year he stressed an easing of protectionism rather than more military aid. He said protectionism limited the export of such Turkish products as textiles and steel goods, and he also said Turkey received little help in reducing a trade deficit of \$800 million with the United States.

The Turkish request will not be an ultimatum, both civilian offi-cials and military officers said, and no thought apparently exists of abandoning the accord. But senior American officials agree with a Turkish contention that Turkey readily provides more facilities than its commitments under its public and secret agreements with the United States.

Political and military analysts say Turkey has considerable room for applying pressure. U.S. military planners consider the installations n this country vital in view of Turkey's long border with the Soviet Union and its critical position be-tween Europe and the Middle East, as well as its position between the Mediterranean and the Black Sea, where one-third of Soviet naval strength is based.

The United States monitors Soother military operations as well as space and strategic nuclear devel-opment from stations in Turkey. Ground-to-air missiles with nuclear warheads guard the Bosporus and Dardanelles. Incirlik Air Base is the most forward U.S. fighter-bomber station in the eastern Med-

Spaniards now back abortions in at least the law's limited cases.

The law does not grant abortion ing it from taking effect.

Abortion Legal in Spain; Church, Doctors Protest

enforced."

By Edward Schumacher

New York Times Service MADRID — Abortion has become legal in Spain over the bitter objections of many doctors and a statement by the Spanish Roman Catholic Church that anyone "who cooperates physically or morally" in the operation will be "automati-

cally excommunicated."

The regulations enacting the new law, signed July 5 by the Socialist government of Prime Minister Fe-lipe González after nearly two years of court battles, went into effect Saturday.

The law limits abortions to cases

of rape, a malformed fetus or danger to the mother. All abortions were illegal before. The operation is free of charge in public clinics. Authorities said they expected

25,000 abortions to be performed in the first year, but hostility by the church and leaders of the National Medical Association suggests that many Spanish women will still have difficulties getting the operation.
The sweeping declaration of excommunication was made by the National Council of Bishops five weeks ago and has been regularly repeated by bishops and priests

ARTHUR HIGBEE

Lord's Prayer: 56 words.

How Reagan Rates As an Arm-Twister

Ronald Reagan ranks right up there with Franklin D. Roosevelt and Lyndon B. Johnson as a president who can twist arms to make members of Congress do it his way.

"The magical ingredient" of a telephone call from the president, according to Martin Tol-chin, who covers Capitol Hill for The New York Times, "is a president's ability to help or hinder a congressional career." Presidents can offer patronage jobs, campaign help and support of a congressman's pet legislation. They also can refuse all these.

But presidential arm-twisting also requires a skillful pursuit of the art of politics, which the late Jake Arvey, once Chicago's Democratic boss, defined as "the art of compromise" or the "art of the possible."

Mr. Reagan is a master of the technique, but Johnson was a veritable artist. Robert C. Byrd. Senate minority leader, recalled. "I have never seen anyone who could twist an arm as well and as painfully as could Lyndon John-

John F. Kennedy liked to take congressmen on the presidential yacht, the Sequoia. Richard M. Nixon "didn't enjoy the armtwisting the way President John-son did," recalled William Timmons, a White House liaison man with Congress. Not so Gerald Ford, Mr. Timmons recalled. Mr. Ford had no hesitancy in buttonholing congressmen and "he worked them good, on a personal basis." And Jimmy Carter, who got rid of the yacht? A veteran Republican senator remarked that "Jimmy Carter makes Richard Nixon look like an extro-

Dole, Gray Doubt U.S. Deficit Cut Will Be Achieved

By Helen Dewar

Washington Post Service
WASHINGTON — Principal figures in both houses of Congress have expressed doubt that the compromise budget plan they approved ast week will reduce the federal deficit by the intended amount, 5280 billion over three years.

The Senate majority leader, Robert J. Dole, and the chairman of the House Budget Committee, William H. Gray 3d, said late last week that the savings for fiscal year 1986 would be closer to \$40 billion, American nation is running at not \$55 billion as had been an-

. Mr. Gray, Democrat of Pennsyl-Latin American economic confer-vania, expressing a widespread ence in Havana, rejected Mr. Gar-feeling in Congress, acknowledged

Mr. Dole, Republican of Kansas. He described the region's huge expressed doubts about whether

"I think we have to be very

cause I doubt Congress will do all White House and congressional the things we've been asked to do, and the deficit will really be much

larger than anticipated."

He said later that the failure could come in a wide variety of appropriations accounts, especially areas where program cuts are not mandated. Other sources said there was likely to be resistance to proposed cuts in farm supports, Medicare and other smaller programs, including such popular ones as Amtrak rail-passenger subsidies

and local economic development.

If Mr. Dole and Mr. Gray are correct, next year's deficit could be \$180 billion or more, compared with \$210 billion anticipated for the current fiscal year, which ends Sept. 30. By fiscal 1987, it could be more than \$220 billion.

The Senate Budget Committee chairman, Pete V. Domenici, Re-publican of New Mexico, observed last week that savings claimed for fiscal 1987 and 1988 were likely to be \$25 billion to \$40 billion less optimistic economic assumptions.

dar-sensing devices that are critical

electronic components of mobile

agents are dissansated with what they consider light sentences fre-quently imposed by the courts on persons convicted of smaggling

leaders had hoped to cut it to below \$100 billion. A separate analysis by Senate Democrats, based on earlier Congressional Budget Office economic assumptions, put the fiscal 1988 deficit at \$161 billion.

These assessments by three of the principals in the seven months of congressional budget negotiations underscore that the figures used in the calculations are questionable, that the economic assumptions are fragile and that there is doubt that Congress will enforce the spending cuts voted Thursday

Part of the savings come from money that probably would not be spent anyway or from using questionable benchmarks for measuring the savings.

Military spending is a primary example. The Pentagon does not spend all the money available in a given fiscal year. But these are still considered "savings" and added to real cutbacks that result from rethan anticipated, largely because of straining the growth of spending authority.

This could mean a deficit of \$150 Even the real savings will depend said in a television interview, "be-

sured against congressional projec-tions or against President Ronald Reagan's own spending plans. Nearly \$13 billion of next year's estimated deficit reduction is the result of using Mr. Reagan's bench-

Officially, Mr. Reagan and both houses of Congress used projec-tions from the Office of Manage-ment and Budget in their aunonnced figures. However, by citing economic projections of the Congressional Budget Office, which are less optimistic, Senate Democrats mofficially predicted a reduction in deficits over three years of \$76 billion less.

As for meeting the spending-cut targets, plans to overhaul farm pro-grams fall short of the budget's target numbers, as does Medicare

First-year savings can be enforced, but savings after that are more difficult to achieve unless the programs themselves are cut. Only about one-quarter of the projected three-year savings stem from permanent changes in law.

Budget negotiators, for instance, did not mandate program cuts for Amtrak, mass transit and a number of other politically popular programs, raising questions as to whether about \$10 billion in future savings will be realized, according to a Senate budget source. and genuien" equipment mentioned in the NIOC House order, to Broder was fined \$50,000 and sentenced for \$294,000, are ratenced to a year in prison. Howev-

In a statement Friday upon passage of the budget and in his weekly radio address on Saturday, Mr. Reagan threatened to use a veto to enforce restraint. But there is doubt within the administration as well as the time Mr. Broder must remain at in Congress as to how well this will Terminal Island Federal Correc-work, especially without David A. work, especially without David A. Stockman as director of the Office of Management and Budget.

Mr. Reagan seldom used a veto to block appropriations bills but, through Mr. Stockman, was successful in using veto threats to trim spending authority in bills before

they were passed.
Although the administration at various times asked Congress to kill more than 20 federal programs or major agencies, the House-Senate budget agreement assumes abo-lition of only four, House and Senate Budget Committee staff aides said Friday.

The four are federal payments to the Conrail freight rail line, which the government is selling; general revenue sharing, to be eliminated after 1986; the U.S. Travel and from heart attacks during the Tourism Bureau; and a small loanguarantee program under the Com-munity Development and Block

Iran's Smuggled Arms: A Sophisticated Penetration of the U.S. Military Supply System

(Continued from Page 1) undercover agent posing as a smug-

The U.S. government's initial response to Iran's smuggling operation in the early 1980s also appears to have been lackadaisical. More recently, however, the Customs Service and the Federal Bureau of Investigation have counterattacked vigorously. They have conducted investigations in more than a dozen locations, from Los Angeles to Boston and from San Francisco to Orlando, Florida, deploying undercover agents and using wiretaps,

hour surveillance. Justice Department statistics show that in the last 12 months, 14 indictments have accused 54 individuals and eight companies of violating the Iranian arms embargo. That is more than double the total number of indictments for the

three previous years combined. The investigations have resulted in more than indictments. Some have turned up information sug-gesting the possibility of high-level

Gorbachev Misses Close of Moscow Youth Festival

The Associated Press MOSCOW — A crowd of 100,000 filled Lenin Stadium here for ceremonies closing the 12th World Youth Festival.

Seven members of the Communist Party Politburo presided over the two-hour spectacle Saturday but the Soviet leader, Mikhail S. Gorbachev, who opened the festi-val involving 157 countries on July

27, was not present.

Members of some Western delegations said Soviet organizers wanted a formal closing communi-que, but many of the Westerners resisted this and also insisted that the content of the final message be

politically neutral.

The document that was finally released noted that the festival was held while European nations, the United States and Canada marked the 10th anniversary of the Heisinki accords on security and human

glers had contacts with "the con-gressman," who he indicated was involved in arms deals.

"The congressman" was not identified in the transcript of the tape recording.

The Customs Service has not "come up with any substantiated evidence at this point" that any congressman is involved, an official with the Customs Service said. The Iranian agent, Yasser Ab-dulrahim Shooshtary, an Iranian

immigrant with British citizenship. also told an undercover customs agent, who was posing as a supplier of high-technology equipment, that a customs agent had been paid mail and telex intercepts and 24-\$25,000 to get illegal shipments out of the country.

Questioned after his arrest, the Iranian agent said he was only re-peating what he had been told by higher-level members of the ring,

investigators say.

The transcripts also disclose that
Brian Lewy, a West German freight forwarder who is a fugitive after being indicted for arms smuggling, used the State Department's diplo-matic courier office in Washington last October to make and receive long-distance telephone calls involving illegal shipments. The tran-script also showed that a mid-level State Department official personally placed one of the calls for him. The official James R. Vandivier.

59, was questioned by federal agents in November about his contacts with Mr. Lewy.

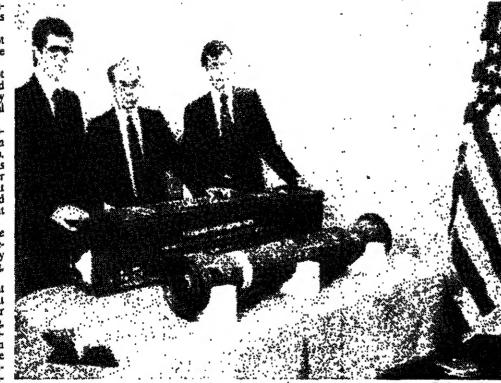

Mr. Lewy, with four other individuals and three companies, have been charged with attempting to export arms to Iran illegally. Iran's global effort to keep its military machine operating is run

from a well-guarded, seven-story, modern building at 4 Victoria St., Called NIOC House because the National Iranian Oil Co. is head-quartered there, the structure also home to the Islamic Republic of Iran Air Force, its Logistics Support Center, and the Iranian Navy and its Technical Supply Office.

From there, neatly typed — but sometimes badly misspelled — orders for munitions, parts and giant war machines are issued.

"Further to our verbal negotiations on 9-19-84, would you please deliver two brand new and genuien (sic) of VAI45E tubes to our assigned freight forwarder at your earliest convenience," reads one or-der. "It is understood that the sum of \$294,000 U.S. dallors (sic) will be paid to you within

The order carries an official stamp. It was sent in September.

Three U.S. officials describe a plot to smuggle arms to Iran. They said the 575-million conspiracy included guided missiles, such as the one shown. The officials, from left, are Perry Doran and Richard Ross of the FBI and Paul O'Brien of the Customs Service.

One method of getting arms des-tined for Iran out of the United States involves using authentic export documents. Iranian agents buy these documents, a U.S. agent "from military officials in Third World countries and in some countries that are American military allies." These documents, usually signed by a military general. trade on the munitions black mar-ket for a minimum of \$100,000.

The Rap on the Budget

Why all the moaning and groaning that Congress didn't cut the deficit enough? If I remember correctly, it set out to cut \$50 billion year, when there is one? This was the critical and the new budget resolution ends up cutting \$55 billion. What's so bad about that?

What is bad is that those numbers don't tell the whole story. The Congressional Budget Office says the \$55 billion will actually work out to only \$39 billion. So we will still be looking at a deficit next year that's more than \$180 billion. Some cut.

And remember, we're still talking about estimates. Budget projections are notoriously unreliable. Tax collections fall short. Spending runs over. In any case, the deficit in the final year of the Reagan administration would still be way over \$100 billion — and that was the

original target of this exercise.

All right, but I'm still impressed. The president pushed Congress and it worked. You just wish it had worked your way.

Worked? The president wanted to eliminate

a whole bundle of programs. How many did Congress kill? One - revenue sharing - and it was due to expire in a couple of years anyway. People can disagree on which pro-grams are good or bad. But when Congress cannot bring itself to kill any at all, that says something important about the functioning of

And so far, we have only been talking about spending cuts. We have not said a word about holding down Social Security increases, or

Why are you so determined to be gloomy? They cut \$55 billion this year. They can cut some more next ye ir.
You've got it backward. If they can't make moment. Congress and the administration fi-nally acknowledged that deficits had gotten out of hand. They sounded serious. Then look at what happened. Congress started making real cuts in defense and non-

started making rear curs in olerate an non-defense programs. There was a moment when it looked as if the president might bend on taxes and Social Security. He actually agreed to a temporary freeze in Social Security, but backed off in a hurry. And for a while, he said he would consider tax increases as a "last resort." But at last resort, he said no.

You may say he has the courage of his convictions. I say his convictions guarantee a deficit crisis long after he is gone.

What crisis? Things are pretty good. Inflation and interest rates are down. Jobs are up. The stock market has never been higher.

All true, but that's just the point. If you can't

save during good times, how on earth can you expect to do so when the economy turns down again? Besides, big deficits carry with them the expectation of more inflation, sooner or later, and that's why interest rates are still quite high. The government's enormous borrowing to cover the deficit just adds to that pressure. And jobs may be up but unemployment is

stuck at more than 7 percent. I'm not gloomy. I'm worried about our leaders' failure to cope with problems when the time is ripe. Deficits are all right, even desirable, in recessions. But when the next recession comes, the deficit will already be excessive—because it was cut so little on Aug. 1, 1985.

Nairobi's Boost to Women

By the standard of these events, the United Nations Decade for Women Conference at Nairobi was a notable success. It seems to have generated a feeling among many delegates that there is something worthy of being called an international women's movement. A final document was produced and, for the first time in three such occasions, the United States found it politically inoffensive enough to sign. Mau-reen Reagan, the president's daughter and head of the U.S. delegation, came home pronouncing the conference "a first-class win for us and for women and for the UN system as a whole." She did much to make it so.

Delegates from some Arab countries and from the Soviet Union and its satellites came to Nairobi chiefly, it seems, to vilify Israel. They did their best, but many other delegates obviously resented any political intrusion that was going to take away from attention to issues of direct concern to women. In this pattern, delegates reacted strongly when the United States — to show we can play the same games they can play," Maureen Reagan explained — launched its own political intervention to condemn a "small group of outlaw states" for supporting terrorism.

It is true that many political issues bear on women's concerns, but it was more true, to the delegates in Nairobi, that an excessive empha-

mine the quest for a feminist consensus. The United States, with Israel, did have to threaten a walkout to get the conference to delete an ugly, UN-type condemnation of Zionism, but it appeared that this was what many women

vanted Washington to do.

The final report on "Forward-Looking Strategies" is premised on the idea that women are a political class and one dominated by men. The report is a long wish-list of feminist goals — a longer and more optimistic list than any single delegation might have written had it not been in the hothouse atmosphere of a UN conference with no responsibility for turning its recommendations into reality.

As they surely had to, the Americans took part in the work on this consensus document. Maureen Reagan was then attacked, unfairly, by some American feminists for countenancing certain demands that go beyond both U.S. law and the Reagan administration's policy. Her response, which was a bit too flip, was to dismiss the document as "a piece of paper."

But the report offers encouragement and stimulus to many women, especially in traditional societies. It is lonely out on the frontier where many women are pursuing change. Nai-

where many women are pursuing change. Nai-robi gave them comfort, and company.

Big Sister and the BBC

We confess we have not seen "At the Edge of the Union," a 45-minute documentary about Northern Ireland produced by the British Broadcasting Corp. But neither have Prime Minister Margaret Thatcher or her home secretary, Leon Brittan. Relying on press ac-counts, they made an astonishing request that the program be suppressed - and the BBC's board of governors has complied with alarming alacrity. It is a bad show all around.

What provoked Mrs. Thatcher was the announcement that the program included an interview with Martin McGuinness, reputedly the Irish Republican Army's chief of staff. Mr. Brittan, who is responsible for law and order, feared the interview would lend "spurious legitimacy" to violence. If it is now supposed to pursue that principle regularly, the BBC is going to have a tough time pursuing the news.

Obviously, political violence poses dilemmas for a free society and its press. Driven by competitive zeal, careless broadcasters can indeed supply terrorists with "the oxygen of publicity," in Mrs. Thatcher's phrase. But when anxious governments impulsively reach for the tap of that oxygen, they betray the very values they aim to defend.

The casualty in this case is the BBC's admirable tradition of independence, a vital source of its credibility. Its broadcasts are publicly financed and the government has the legal right to compel it to suppress information. But that power was not even invoked. Instead, the government simply requested suppression of a program that had taken months to prepare under an established code for dealing with political violence. By yielding, it was the BBC that gravely undermined itself.

Yet in an Orwellian touch, Mrs. Thatcher dares to boast that "I am never going to put ceasorship on — we are not that kind of party." Over at BBC, however, they have obviously decided that Big Sister has arrived.

FROM OUR AUG. 5 PAGES, 75 AND 50 YEARS AGO

1910: Why Dollars Flow to Europe LONDON - The London "Globe" says: "We do not know where the American writer who has recently been discoursing on the flow of dollars to Europe obtains his statistics, but his account is so detailed that we may assume it is not imaginary. The stream of dollars reaches the respectable volume of about a hundred and fifty millions sterling. A large part of this goes abroad for two reasons. One is that America, though blessed with some of the most magnificent scenery in the world, is so uncomfortable a country that the American with a holiday in front of him and money to spend goes somewhere else. The other is that American "finance" has so shaken the confidence of the American in his own securities that he leaves

them to the foreigner for investment.

1935: Pacifists March in Harlem

NEW YORK - A cross-section of New York's pacifist citizenry - Socialists, Communists and college students, Negro and white — banded together in Harlem [on Aug. 4] for a "march against war" and in particular a demonstration against Italy's threatened invasion of Abyssinia. There were 25,000 in the parading columns, which for three hours trudged through the sweltering streets of the black neighborhood, waving hanners, singing shout-ing and denouncing the forces of militarism. There were ex-service men in the khaki uni-forms they were to the war to end wars, Communist groups in gray shirts and hats, and Young Liberators of Harlem in red and blue tunics purporting to represent the uniforms of Emperor Haile Selassie's forces.

ment to The New York Times.

events since World War II.

Washington in the late 1970s.

It ended the war.

The atomic bomb accomplished

SACRAMENTO, California — Forty years ago this Tuesday in Hiroshima: the dreadful flash, the wrist watches fused forever at 8:16 A.M. The question still persists: Should the United States have

dropped the atomic bomb?

History seldom gives decisive answers, but documents recently declassified point to a clear judgment:
Yes, it was needed to end the war. It saved countless lives on both sides.

In the early summer of 1945, Japan, under tight control of the militarists, was an implacable, relentless adversary. The Japanese defended territory with a philosophy Ameri-

> Without the bomb there might have been an invasion, with awesome loss of life.

cans had seldom encountered: Soldiers were taught that surrender was worse than death. There was savage resistance in battle after battle.

resistance in battle arter battle.
Of the 5,000-man Japanese force at
Tarawa in November 1943, only 17
remained alive when the island was
taken. When Kwajalein was invaded
in February 1944, Japanese officers
slashed at American tanks with samurai swords; their men held grenades against the sides of tanks in an effort to disable them.

On Saipan, fewer than 1,000 of the 32,000 defending Japanese troops survived. Casualties among the Japanese-ruled civilians on the island numbered 10,000. Parents bashed their babies' brains out on rocky cliff sides, then leaped to their deaths. Others cut each other's throats; children threw grenades at each other. America suffered 17,000 casualties.

Just 660 miles (1.065 kilometers) southeast of Tokyo, Iwo Jima's garri-son was told to defend the island as if it were Tokyo itself. In the first day of fighting, there were more American casualties than during D-Day in Normandy. At Okinawa — only 350 miles south of Kyushu — more than 110,000 Japanese soldiers and 100,000 civilians were killed. Kamikaze attacks cost the navy alone some

10,000 casualties. The army and ma-rines lost more than 50,000 men. In the early summer of 1945, the invasion of Japan was imminent and everyone in the Pacific was apprehensive. The apprehension was justified, because U.S. intelligence was good: With a system code-named "Magic," it had penetrated Japanese codes even before Pearl Harbor. "Magic"

would play a crucial role in the clos-ing days of the war.

Many have maintained that the bomb was unnecessary because in the closing days of the war intercepted Japanese diplomatic messages dis-closed a passionate desire for peace. While that is true, it is irrelevant. The Sapanese government remained in the hands of the militarists: Their messages indicated a willingness to fight to the death.

Japanese planes, gasoline and ammunition had been hoarded for the coming invasion. More than 5,000 aircraft had been hidden everywhere to be used as suicide weapons, with only enough gas in their tanks for a one-way trip to the invasion beaches. More than two million men were moving into positions to defend the home islands.

The object was to inflict such appalling losses that the Americans would agree to a treaty more favorable than unconditional surrender. The army chief of staff, General George C. Marshall, estimated that American casualties could run as high as one million.

The willingness of the Japanese to die was more than empty bravado. Several of my coller :es at Kyushu University told m 1 as boys of 14 or 15, they were being trained to meet the Americans on the beaches with little more than sharpened bamboo spears. They had no illusions about their chances for survival.

The Potsdam declaration calling for unconditional surrender was beamed to Japan on July 27. On July 30, the Americans were informed that Japan would ignore the ultimatum. A week later, the bomb was dropped. Could America not have warned the Japanese in advance, critics

asked, and dropped a demonstration

bomb? That alternative was vetoed

No, He Had Other Options

By Gar Alperovitz

on the grounds the bomb might not work, or that the plane carrying it might be shot down. Moreover, it is questionable how effective a demon-Harry S. Truman knew he could al-most certainly end World War II without using the atomic bomb: The United States had cracked the Japastration bomb might have been. The militarists could have imposed a news blackout as complete as the one im-posed after the disastrous battle of Midway and continued on their suionese code, and documents released over the last 40 years show that Mr. Truman had two other options.

The first option was to clarify America's surrender terms to assure the large control of the la cidal course. That is exactly what happened at Hiroshima. Within hours, the Japanese government sent in a team of scientists to investigate

the Japanese it would not remove their emperor. The second was sim-ply to await the expected Soviet dec-laration of war — which, U.S. intelli-

gence advised, appeared likely to end the conflict on its own.

Instead, Hiroshima was bombed Aug. 6, 1945, and Nagasaki three days later. The planned date for the Soviet Union's entry into the war

against Japan was Aug. 8.

The big turning point was the emperor's continuing June-July decision to open surrender negotiations through Moscow. Top American officials — and, most critically, the president he two factoors remained at an impasse. At 2 A.M., Prime Minister Kantaro Suzuki asked the emperor to decide. In a soft, deliberate voice, the emperor expressed his great longing for peace. The war had ended. extraordinary: Mr. Truman's secret diaries, lost until 1978, call the key intercepted message "the telegram from Jap Emperor asking for peace." Other documents — among them It was impossible, in August 1945, to predict the awesome shadow the bomb would cast on humanity. The decision to drop it seemed both simple and obvious 1956 a

newly discovered secret memorandums from William J. Donovan, di-rector of the Office of Strategic Serpersonally advised of Japanese initiatives through Swiss and Portuguese channels as early as three months before Hiroshima. the war with a royal word" - as one

Lurching Incautiously

To a Crucial Summit

By Stephen S. Rosenfeld

WASHINGTON — With the first meeting of Secretary of State W. George Shultz and the new Soviet foreign minister, Eduard Shevardhadze, in Helsinki, the superpowers have formally begun planning for a summit meeting that increasingly bids to become one of the pivotal

It will enable Ronald Reagan to take his first personal measure of

Soviet policy in a period of potentially heightened activism. For the Kremlin it will be an opportunity for the first up-close reading of American policy since the conservative wave started flowing through

It is a mistake for the great powers to go so long without a summit. It

It is a mistake for the great powers to go so long without a summit. It deprives their leaders of the opportunity to put personal assessments into their policy equations. It builds unnatural tension into those summit meetings that do take place. Ready or not, however, November is coming. Unfortunately, nothing visible at Helsinki alters the impression that the two powers are lurching summitward in a rather casual way. The meeting, with all of its natural freight, is not going to be allowed just to happen. A tremendous amount of extra freight is being piled on. The Kremlin started it in April by announcing that it would stop its deployment of SS-20 missiles aimed at Western Europe — it had been deploying them weekly for eight years — until November. If by then the United States did not halt deployments of missiles in Europe (which were begun in 1983 to counter the SS-20s), Mikhail Gorbachev said, watch out. So November was bound to be a tense time. And the scheduling of a

So November was bound to be a tense time. And the scheduling of a summit meeting to coincide with the deadline for the SS-20 moratorium puts the whole European issue squarely on the Reagan-Gorbachev plate.

That is not all. In June, Mr. Reagan made his own heavy contribution to the November sweepstakes. While deciding to stick with the terms of the SALT-2 arms-control agreement, he challenged the Russians to "correct their noncompliance," and he commissioned the Pentagon to tell him, by Nov. 15, what arms programs the United States should add to

offset any violations uncorrected by Moscow.

Mr. Reagan was finally going to carry off his ambitious effort to cope with the Russians' lagging compliance with old arms-control agreements, even while trying to negotiate new agreements at Geneva. The summit falls precisely as Mr. Reagan's Nov. 15 deadline comes due.

And last week Mr. Gorbachev upped the ante. He announced that the

It was a patent attempt to draw public attention away from the nagging

issue of verification. And it cuts across the Geneva arms-control talks, where the ostensibly mutual effort is to negotiate binding restraints.

But there it is. Add to this the consideration that a new Soviet five-year

economic plan is in the making and that by some calculations the

Russians are today where Americans were five years ago: ready to go to

the next generation of weapons. You will then see that the Kremlin is

talking not only about resuming testing but also about picking up the

pace of major new weapons programs.

Mr. Reagan and Mr. Gorbachev are without experience in high-stakes

international negotiations. They are acting at a time of poor U.S. Soviet relations and when the great issues lying between them are at best in a

state of paralysis. One of these men is recovering from a cancer operation and the other has as his foreign minister a provincial apparatchik.

One might have thought that the two leaders would be edging warily

toward their first summit meeting. Instead, each, responding perhaps to domestic imperatives, is turning up the heat under the other. Each seems

confident, without evident reason, of his personal bargaining prowess.

The Bashington Post

Care, and modesty, are desperately needed.

Soviet Union had begun a unilateral moratorium on nuclear testing.

WASHINGTON — Though it top presidential aide put it. Having decided to use the bomb, however, attention, there exists overwhelming decided to use the bomb, however, Mr. Truman was urged by Secretary

Mr. Truman was urged by Secretary of State James F. Byrnes not to give assurances to the empears before the weapon had been demonstrated. Additional official records, including minutes of top-level White House planning meetings, show the presi-dent was clearly advised of the im-portance of a Soviet declaration of

war: It would pull the rug out from under Japanese military leaders who
were desperately hoping the powerful
Red Army would stay neutral.
General George C. Marshall told
Mr. Truman in mid-June that "the
impact of Russian entry on the al-

dent - understood the move was

A month later, the American-Brit-ish Combined Intelligence Staffs ad-vised their chiefs of the critical imvices - show that Mr. Truman was pan's keeping the emperor, which seemed the only sticking point. American leaders were sure that if

he so chose "the Mikado could stop

portance of a Red Army attack. As the top British general, Sir Hastings Ismay, summarized the conclusions for Prime Minister Winston Churthe war against Japan, the Japanese would probably wish to get out on almost any terms short of the dethronement of the emperor." Mr. Truman's private diaries also

American leaders

'on the kill.'

thereafter if we land."

wanted to end the war

before Moscow got in .

ready hopeless Japanese may well be the decisive action levering them into capitulation at that time or shortly

record his understanding of the sig-nificance of this option. On July 17, 1945, when Stalin confirmed that the Red Army would march, Mr. Truman privately noted: "Fini Japs when that comes about."

There was plenty of time: The American invasion of Japan was not scheduled until the spring of 1946. Even a preliminary landing on the island of Kyushu was still three months in the future was still three months in the future.

General Dwight D. Eisenhower, appalled that the bomb would be used in these circumstances, urged Mr. Truman and Secretary of War Henry L. Stimson not to drop it. In his memoirs, he observed that weeks before Hiroshima, Japan had been seeking a way to surrender. "It wasn't necessary," he said later, "to hit them

with that awful thing."
The man who presided over the Joint Chiefs of Staff, Admiral Wilham D. Leahy, was equally shocked; "The use of this barbarous weapon at Hiroshima and Nagasaki was of no material assistance in our war against Japan. The Japanese were already defeated and ready to surrender."

Why, then, was the bomb used? American leaders rejected the most obvious option — simply waiting for the Red Army attack — out of political, not military, concerns.

As the diary of one official put it, they wanted to end the war before Moscow got "in so much on the kill." Secretary of the Navy James V. Forrestal's diaries record that Mr. Byrnes "was most anxious to get the Japanese affair over with before the The European Satellites Russians got in." American leaders had also begun

to think of the atomic bomb as what Secretary Stimson termed the "mas-ter card" of diplomacy. Mr. Truman postponed his Potsdam meeting with Stalin until July 17, 1945 - one day after the first successful nuclear test.

— to be sure the atomic bomb would strengthen his hand before confronting the Soviet leader on the shape of a postwar settlement.

To this day, we do not know with absolute certainty Mr. Trumm's personal attitudes on several key issues. Yet we do know that his most important adviser, Secretary of State Byrnes, was convinced that dropping the bomb would serve crucial longrange dipiomatic purposes.

As one atomic scientist, Leo Szilard, observed: "Mr. Byrnes did not argue that it was necessary to use the bomb against the cities of Japan in order to win the war. Mr. Byrnes' ... view [was] that our possessing and demonstrating the bomb would make Russia more manageable."

The writer, a historian and political economist, is author of a revised edition of "Atomic Diplomacy: Hiroshima and Potsdam." He contributed this comment to The New York, Long.

Colonialist Obstinacy in Hong Kong

By Frank Ching

HONG KONG — The British authorities here, who will have to turn Hong Kong over to China in 1997, are alienating the public in their efforts to show that they are not a lame-duck administration. Dire

consequences could result.

Long accustomed to running Hong
Kong as their own fieldom, with little
interference from London, local officials have been at pains to show that

they are still in charge, and will remain so, until July 1997.

Their handling of several issues has betrayed a colonial mind-set that is ill-prepared to deal with an increasingly vocal and politically conscious population. The administration has shown little awareness of the sensitivities of the 5.5 million people here, most of them refugees from China or

most of them refugees from China or children of refugees.

Although the Chinese-British agreement provides that Hong Kong will become a capitalist enclave in socialist China, many here fear their personal rights and freedoms will be curtailed after China takes charge. As if to confirm their anxieties

As if to confirm their anxieties, only weeks after signing the accord, in December, the administration introduced a bill in its hand-picked Legislative Council to do away with jury trials in cases of complex commercial crimes. The move seemed franght with sinister implications.

A public outcry arose, led by the Hong Kong Bar Association. Its chairman decried the measure as "the thin end of the wedge" that might one day lead to dismantling of the jury system, a pillar of any free society. Rumors of a secret understanding under which Britain would make Hong Kong more compatible with the system in China began to spread.

These rumors gained strength as the administration, while agreeing to shelve the commercial crimes bill, came up with other controversial proposals, including establishment of a tribunal to decide if articles or publications were pornographic or "objectionable." The panel's decisions

tribunal to decide if articles or publications were pornographic or "objectionable." The panel's decisions would be binding on courts, and judges would have no choice but to find guilty any person dealing in such publications. Again, because of protests from the legal profession, the administration backed down.

Then, the administration introduced legislation, ostensibly to define the powers of the Legislative Council, that would have deprived the public of the right to attend its sessions and would have made it a crime for any newspaper to report on the council's

would have made it a crime for any newspaper to report on the council's closed proceedings, even if such re-ports were accurate. The bill would have made it a crime for anyone to commit "any act of intentional disre-spect to or with reference to the pro-ceedings" of the council Such "disre-

ceedings" of the council. Such "disre spect" would earn a year in prison.

In response to public protest, the administration and its legislature which consists entirely of senior civi Ismay, summarized the conclusions for Prime Minister Winston Churchill: "If and when Russia came into

amendments that in effect emasculated the bill, but still enacted it despites the widespread calls for a deferral.

The British, who have paternalistically run Hong Kong for 133 years, were caught by surprise by the strong public reactions. Accustomed to a politically apathetic populace, they have not yet come to grips with the have not yet come to grips with the

new political consciousness. The administration's actions have created an atmosphere of suspicion and hostility. Unless the British take immediate steps to regain the confidence of the public, there is a readanger that the administration will become increasingly isolated and its credibility eroded. It is likely that if it continues to stonewall in the face of public criticism, some Hong Kong political groups will feel so alienated they will appeal directly to Beijing for support. If that happens, the British may find their position untenable. Conspiracy theories are so ram-

pant that the chief secretary (who is second to the governor in power), Sir David Akers Jones, has had to state repeatedly in public that there is "no idden agenda."

Whether such bland assurances will be effective remains to be seer but as the author of a letter to r newspaper said: "Let the governmen! . . be under no illusion. They now have on their hands a thoroughly frightened populace"

The writer, former Beijing correspondent of The Wall Street Journal, is author of "Hong Kong and China: For Better or for Worse." He contributed this comment to The New York Times.

LETTERS

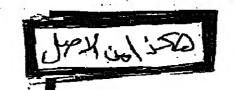

I read with interest Axel Krause's report "Europe Slow to Hook Up Satellites" (July 11). While the development opment of satellite TV reception in Europe is far behind that of the United States, it is not quite in the early stages described. British manufacturers have sold about 1,500 satellite systems in the last 12 months. There are receiving systems in hotels in Paris, Geneva, Amsterdam, Milan and ondon. Britain liberalized its regulations for satellite TV reception in May. As Mr. Krause notes, remaining regulatory problems in Western Europe are restraining growth more than are cost or availability.

Hint of Early Election inacy in In Philippines Hailed By Marcos Opponents

By Steve Lohr New York Times Service MANILA — Opposition leaders in the Philippines, responding to an amouncement that President Ferdinand E. Marcos is seriously considering calling a presidential election this year, say they are eager and optimistic over the prospect of an electoral battle.

The opposition is ready for elections, and so are our people, who have already rejected his repugnant regime," Salvador H. Laurel said Friday. Mr. Laurel is president of the United Nationalist Democratic Organization, the larg-

est opposition parry.

The government announcement that a presidential election may be called within months was made after a meeting Thursday night be-tween Mr. Marcos and the leaders of his ruling party, the New Society

After the caucus, the presidential palace issued a statement saying that Mr. Marcos and his followers "seriously discussed" a proposal to hold elections for president and vice president this year. The next scheduled presidential election is in 1987, when Mr. Marcos's current six-year term expires, Mr. Marcos has been in office 19 years.

The president, according to the government statement, is also considering dissolving the National "what action the opposition will would get no Assembly, which was elected in take on their reported plan to file a of the votes.

May 1984. In that election, the op-position made unexpectedly strong gains, winning about one-third of the 181 contested seats.

For more than a year, the oppo-sition has been calling on Mr. Marcos to step down but until now he has repeatedly rejected the idea of calling early elections.

Yet, with growing criticism of his presidency, including an impeachment resolution scheduled to be filed in the National Assembly this week, Mr. Marcos has become tempted by the prospect of con-fronting his adversaries at the polls, according to a member of the rul-

ABS has been one of the most important innovations in car safety over the past decade. BMW drivers enjoy its benefits in a unique way.

ABS anti-lock braking is already a standard feature on nearly 50% of all **BMW** models.

BMW wasn't just the co-developer of the ABS anti-lock braking system. BMW has also adopted and implemented this latest development towards maximum braking safety more comprehensively than any other manufacturer in the world. And that's why you'll discover that ABS is a standard on all 6 and 7-Series cars and on the top 5-Series models.

BMW's ABS system: the very highest standard of braking safety.

ABS works more precisely, more efficiently and more reliably than a human being ever could.

And it completely eliminates any risk of wheel-lock, whatever the circumstances. As a result, ABS will prevent a car skidding even in an emergency braking situation or on difficult road surfaces. With ABS you can also apply full braking power while comering. At the same time, steering ability is fully

retained at all times, allowing you to take advantage of any gaps which present themselves between the obstacles ahead, even though you've got your foot flat down

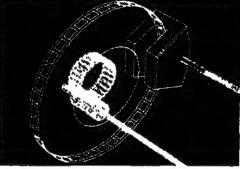

on the brake pedal. And because of the unique way it makes maximum use of the braking forces and the adhesion characteristics of each individual wheel. ABS can also help to reduce braking distances dramatically. But ABS doesn't just represent an increase in driving safety. It simultaneously improves motoring economy. The reduced tyre wear can cut tyre costs by anything up to 30%, and tyre damage caused by locked-wheel braking at high speeds is also avoided.

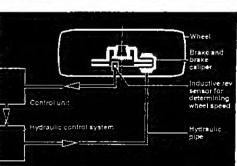

Safety is part technology and part its consequence. BMW takes both further.

Under numerous circumstances, vehicles equipped with ABS can achieve significantly shorter braking distances. And this naturally means that one of the most important prerequisites for avoiding rear-end collisions with following cars, which could result from this improved braking performance, is that the car's brake lights are always in full working order. That's why ABS on a BMW features an extremely valuable back-up system; Active

Check Control. it constantly monitors seven of the car's most important functions, including brake and rear lights, and it immediately calls the driver's attention to any malfunction.

ABS with BMW.

ABS is further proof of how BMW comprehensively exploits the astonishing potential of electronics in building better cars. and how it consistently makes it available as quickly as possible to its drivers.

Don't trail behind technological progress in international top-class motoring. Drive BMW.

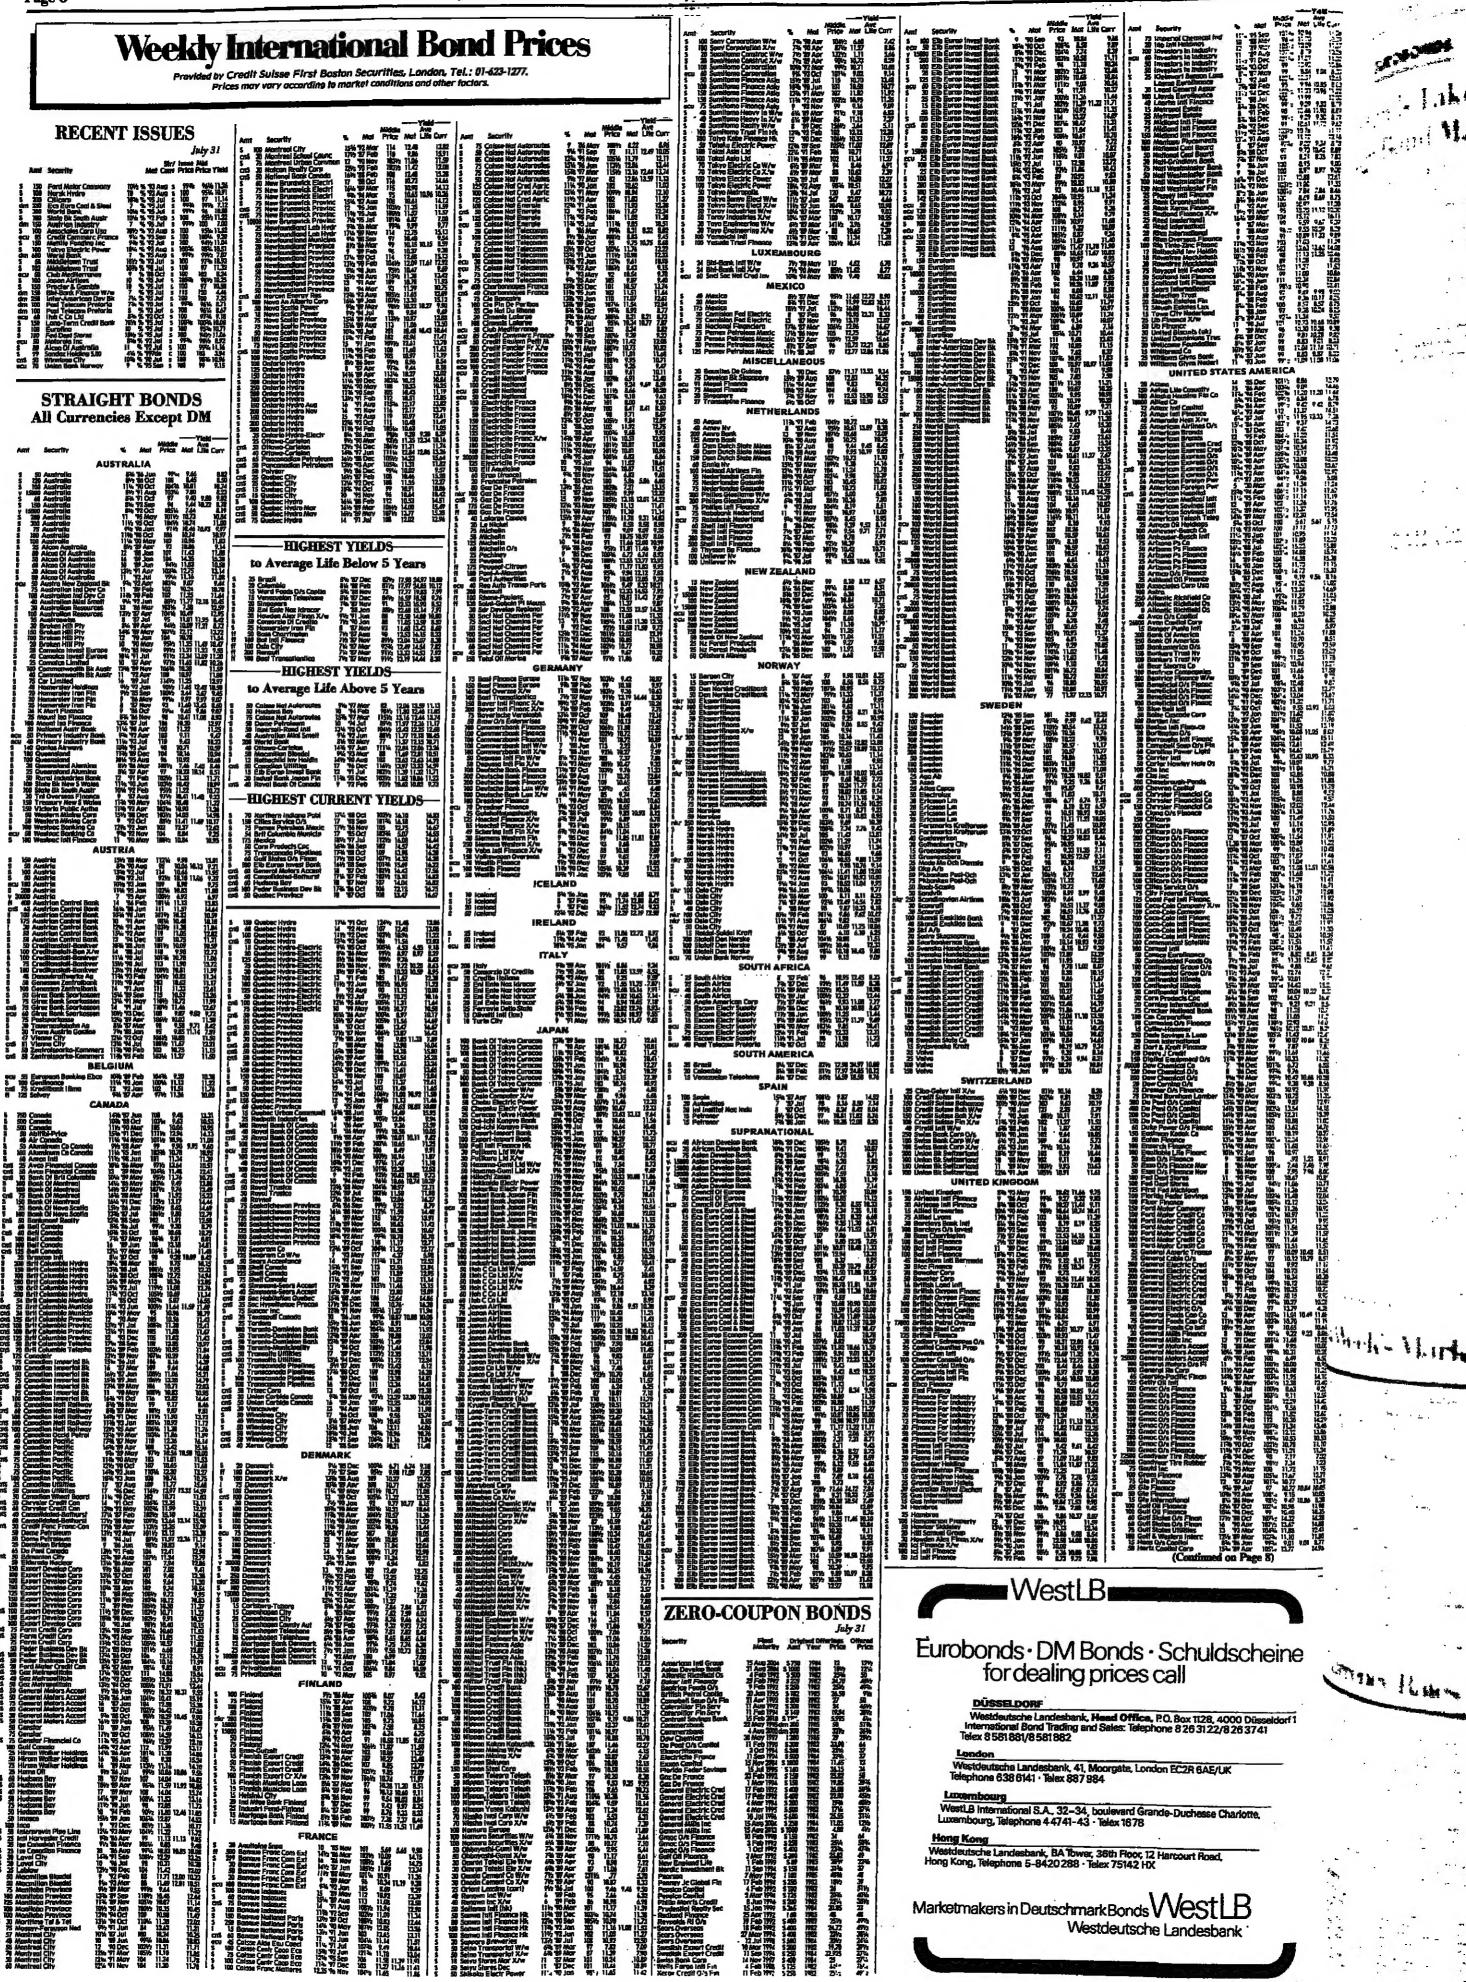

Model and equipment availability in the BMW interna-tional range may vary from country to country.

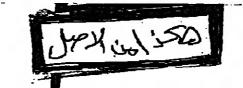

ABS consists of a revolution sensor fitted to each wheel and coupled to an electronic unit which then converts the revolution data provided by the

At the very first hint of a wheel locking, the fluid pressure to that particular wheel is reduced and the wheel can continue to turn, avoiding wheel-lock and ensuring safe braking with full steering control.

Pension Funds Take Note Of Foreign Bond Markets

By BOB HAGERTY

TONDON - Like American tourists landing in Europe, U.S. pension-fund managers are discovering that the dollar also falls. The tourists can do little about it. The fund managers are beginning to take the international bond markets more seriously.

Professional portfolio managers in London argue that big U.S. investors should be diversifying their bond holdings no matter which way the dollar is headed at the moment. But the currency's recent slide has concentrated minds. Pension funds sponsored by such U.S. giants as General Motors Corp. and American Telephone & Telegraph Co. have

been increasing their foreign bond investments, and others are taking note.
There's really been a ma-

for acceleration of interest," said James Waterman, a vice president at InterSec Research Corp., an investment research firm based in Stamford, Connecticut. "It's been a real boom this year, albeit from a low base." InterSec estimated a year

ago that U.S. pension funds, endowments and founda-tions had invested a total of \$850 million in diversified international portfolios of bonds and other fixed-income securities. By June Cedel 14.771.1 9.772.4 4.582 1985, Mr. Waterman esti-

mated, the figure was well over \$2 billion. That is not much when compared with the estimated \$1.2-trillion redemption value of all issues outstanding in the Japanese, British, West German, Dutch and Swiss bond markets. Nor does it begin to rival investment in foreign equities. The same U.S. institutional investors have put about 10 times as much into foreign equities as they have into foreign bonds, Mr. Waterman

Portfolio managers expect that equities will continue to dominate the overseas holdings of U.S. institutions, but the fastest growth currently is needed. So European fund-management companies are making regular trips to New York to show off their

companies are making regular trips to New 1 the to show the international bond market expertise.

"I have found the level of interest to be immeasurably higher," said Alan Brown, a British bond-fund manager recruited last year to head American Express Asset Management (UK) Ltd., a London unit of American Express Co. Mr. Brown said he personally had come across 17 major U.S. institutions preparing to appoint managers for international bond portfolios.

Peter J. Widmer, a senior vice president at Bank Julius Baer &

Co. in Zurich, which already manages bond portfolios for three big U.S. institutions, said that he had found "a terrific increase of interest" since the dollar turned downward.

Wished to invest abroad at all concentrated on foreign stock markets. A strong dollar helped foreign companies export more to the United States, and share prices often rose fast enough to outpace any losses suffered by the U.S. institutions in translating their returns into dollar terms.

Now that the dollar is widely believed to be on a long-term decline, a far stronger case can be made for international bonds. Bonds give you a cleaner currency play, said Mr. Widmer. Shares in such companies as Imperial Chemical Industries

with the fall of the dollar because export prospects are bleaker. Bonds, by contrast, offer potential for what John Rigg of Kleinwort Benson International Investment Ltd. describes as a "double whammy."

For instance, a U.S. investor who bought gilts, or British government securities, last February would now be showing a gain of approximately 30 percent from the rise of the pound against the dollar. The strength of the pound, in turn, has allowed the British government to nudge down interest rates, feeding a rally in bond prices. So the investor also has a gain in the market value of the gits.

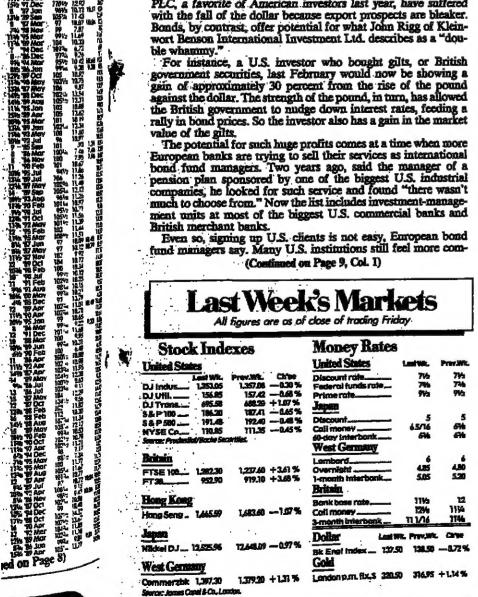

The potential for such huge profits comes at a time when more

European banks are trying to sell their services as international bond fund managers. Two years ago, said the manager of a pension plan sponsored by one of the biggest U.S. industrial companies, he looked for such service and found "there wasn't much to choose from." Now the list includes investment-management units at most of the biggest U.S. commercial banks and

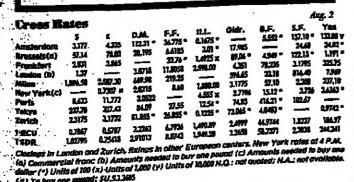

British merchant banks.

Even so, signing up U.S. clients is not easy, European bond fund managers say. Many U.S. institutions still feel more com-(Continued on Page 9, Col. 1)

Debenhams May Be Carved Up

By Bob Hagerty uernational Herald Tribus

LONDON — The long, fero-cious battle for control of Deben-hams PLC is over, but a carving up of Britain's second-largest depart-ment store operator is still in pros-

As reported, Burton Group PLC, a highly successful retailer of casual clothing for the young and affluent, announced late Friday that its £550-million (\$753-million) takeover bid had attracted a majority of On Saturday, Burton put the number of the shares it controls at 53 percent of the total and disclosed that it gained that narrow victory at the last minute when two major Debenhams shareholders offered

The takeover means a huge expansion for Burton. It had pretax profit of £56.4 million last year on sales of £415.9 million. That com-pares with sales of £723.8 million and pretax profit of £40.7 million

But the outcome leaves House of Fraser PLC, Britain's largest department store company, with a shareholding of just under 25 per-cent in Debenhams. Fraser, which owns Harrods and about 100 other stores, built up that stake in recent weeks in an effort to thwart Burton's bid. Had the bid failed, Fraser and Debenhams planned to cooperate in credit cards, merchandising and distribution — a plan that many snalysts said was tantamount to a merger.

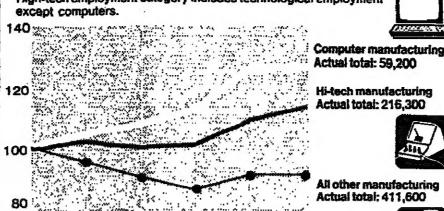

Fraser, which itself was acquired last March for £615 million by the Al-Fayed family of Egypt, has not made clear its intentions for its stake in Debenhams. "House of Fraser is considering its position." a spokesman said Sunday.

Some analysts have suggested that Fraser could use the stake as a bargaining chip in negotiations with Burton. For instance, Fraser might be interested in acquiring certain Debenhams stores, such as Harvey Nichols, an upscale department store near Fraser's own hugely successful Harrods store in London's Knightsbridge district.

Aside from Fraser, there are sevtat Mothercare PLC, a British retailer of furniture and clothing, backed Burton in the bid. Habitat also acquired an option to acquire 20 percent of the shares in Debenhams from Burton.

Harris Queensway PLC, a fast-growing retailer of carpeting and discount familiare, also is involved. Harris last year formed a joint venture with Debenhams to handle that company's furniture, carpeting and consumer electronics sales. On Friday, Harris helped swing the outcome of the takeover bid by selling its Debenhams shares to Burton at the eleventh hour.

Boston Looks Beyond Computers

Source: Massachusetts Department of Employment Security

By Thomas J. Lueck
New York Times Service
BOSTON — In the two decades since U.S. computer com-

panies began seeing a market in every office, factory and home, this city of world-class research has blossomed into a center of world-class manufacturing.
But the computer revolution has stalled. And Boston, which

has emerged as the strongest urban economy in the United States, is wondering where its future growth will come from. The computer industry was growing so fast there had to be a shakeout," said Michael S. Du-

kakis, governor of Massachu-setts. Fred Wang, executive vice president of Wang Laboratories Inc., said: "This industry is in a tough transition."

The governor is not pessimistic. Within a 40-mile (64.5-kilo-

meter) radius is one of the world's largest concentrations of netic engineering, photovoltaic power cells, fiber optics and oth-

"We don't have all our eggs in one basket," he said. "There is a whole new generation of entrepreneurs moving in." In the Boston area, where the

unemployment rate has been hovering at about 3 percent lower than in any other large U.S. metropolitan area — the word "layoff" had been all but forgotten until recent months. But since May, more than 3,000 workers have lost their jobs at Wang, Data General Corp. and other computer companies here, and the downturn is expected to

"My gut tells me there is more had news to come," said Kenneth Donohue, a spokesman for Data General, which laid off 1,300 workers in June and halted

first two weeks in July.

David Birch, an economist

Pį

and physicist at the Massachusetts Institute of Technology, put it this way: "The computer mak-ers won't wither away. They'll oscillate, go up and down, and join the real world."

'As of May

Indeed, in a metropolitan area whose economy is fueled by prestigious universities, top scientific research and young com-panies on the leading edge of technology, some believe the computer industry has grown mature, if not mundane.

When you strip away the glamour of computers, you have a capital goods industry that isn't all that exciting," said Harry J. Healer Jr., vice president of Farrell Healer & Co., a large venture capital firm in Boston.

The computer slump is blamed on many factors. The (Continued on Page 9, Col. 1)

IMF Urges Egypt To Cut Spending As Deficit Swells

By Judith Miller New York Times Service

CAIRO — The International Monetary Fund has warned Egypt that its balance of payments posi-tion is facing serious deterioration and that there is an "urgent need" to enact an austerity program.

A 43-page IMF report, completed in June, estimates that Egypt's foreign debt is more than \$31 billion, almost twice the government's official estimate. The figure ex-cludes Egypt's debt to the Soviet Union, which is not an IMF mem-

The report, made available to The New York Times, projects a deficit in the balance of payments for this year of \$1.3 billion, compared with the modest surplus that

Egypt previously ran.

Balance of payments refers to total foreign trade in goods and services, flows of gifts and foreign aid, capital loans and official settlements and reserves.

Even if a significant austerity program is enacted and sustained over several years, "projected fi-nancing gaps are likely to remain very substantial," the report as-

The document, prepared by the fund's staff, notes that President Hosni Mubarak has taken steps recently to deal with the situation by raising prices, reducing the large subsidies provided to various segments of the economy, limiting public sector employment, and re-ducing imports. But those steps, the report concludes, "have been inad-

Egypt has informally discussed with the IMF the possibility of arranging a stand-by credit agree-

Egyptians Lend

GM \$700 Million CAIRO — Misr Iran Development Bank of Egypt said Sunday that it would arrange a \$700-million loan to help General Motors Corp, build a car

plant in Egypt. A spokesman said the bank would lead manage the syndicated loan.

GM plans to make two 2-liter models for the Egyptian market at a plant to be built between Cairo and Alexandria, he said.

ment, Egyptian officials confirmed. The IMF would undoubtedly insist on stringent economic changes before granting such assistance. Egyptian officials said. They fear that rapid price increases and falling subsidies could be politically unsettling, perhaps leading to food riots similar to those that faced Anwar Sadat, the late president, in

The IMF report is the latest expression of concern about Egypt's growing debt burden. During Mr. Mubarak's trip in February to the United States, and in a visit last month by Prime Minister Kamal Hassan Ali, Egyptian officials repeatedly asked the Reagan administration about the possibility of rescheduling or partly forgiving Egypt's debts. The administration has been reluctant to agree, fearing that would lead to an avalanche of

E.F. Hutton: Tightening the Organizational Reins

By James Stemgold
New York Times Service

NEW YORK - After pleading uilty to defrauding banks through check-overdrafting scheme, E.F. Hutton & Co. is undertaking a corporate treasurer. sweeping overhaul of its organiza-

operating structure, the 81-year-old of the B.F. Hutton Group. brokerage and investment banking firm is now laying plans to become more centrally controlled, shaking up nearly all of its departments. The looseness of the old struc-

ture was evident two weeks ago when Hutton, which has 17,000 employees, told an incredulous congressional panel that it had never prepared an organizational chart. The structure was a legacy of firm that grew nationally by acquiring regional brokers that con-tinued to operate with relative autonomy. The changes, according to senior

alignment of nearly all of Hutton's financial operations. These include the establishment of a new internal cash management system and the appointment, for the first time, of a

In addition, the firm's marketing tional structure and management strategy will be revamped. And it is likely to be searching for acquisi-Long an anomaly on Wall Street tions to bolster weak departments, because of its highly decentralized said Robert Rittereiser, president

Mr. Rittereiser, who is directing the strategic shifts, joined Hutton last June from Merrill Lynch & Co. He said he also aimed to open better lines of communication between the branches and headquar-

While all of these measures will eventually prove expensive, as well as occasionally disruptive, Hutton Hutton's genesis, as a West Coast already is suffering some heavier cosis. Paul J. Beehler, a senior vice president, said Hutton was heavily overcompensating its banks, thus forgoing interest income, until its new cash-management system is

an industry analyst at Lipper Analytical Services. "This also is forcing management to get off its pedestal and communicate more with the troops in the field. But there will be pain in the process."

Mr. Rittereiser said the company

must also rebuild several key areas, primarily its weak corporate Gterm the focus will be on asserting more central control, he said.

A product of this was that instead of having one office collecting funds from branches -as other major Wall Street brokers have -Hutton's system routed funds circuitously from branches to regions to two nationwide concentration

This decentralized approach is what allowed the illegal overdraft-ing of regional bank accounts by branch and regional managers to take place without detection by senior executives at headquarters, the a monthly or quarterly basis," he

The check-overdrafting scandal mass started a whole series of changes there," said Perrin Long.

Although the catalyst for the changes is clearly the check-overdrafting scandal, Mr. Rittereiser said the firm was two to three years overdue for such a revamping of organizational structure. "Any organization goes through stages of growth." he said. "E.F.

Hutton over the last 10 to 15 years has grown exponentially in size and complexity. At some point you have to adjust for the next generation of growth. I think that we're at William Renshaw, a cash man-

agement expert with Arthur Young & Co. who advised Hutton on its system after the fraudulent scheme was uncovered, said he was struck at both the level of decentralization and amount of duplication in Hutton's cash concentration system, He added that the system was also highly sophisticated, aggressive and precise, when used properly.

They were doing daily what many other companies did only on

Caracas Sees Interest Rates Aiding Revenue

CARACUS - Finance Minister Manuel Azpurua said Sunday that lower interest rates would compensate for the loss of an estimated \$215 million in oil revenues expected after Venezuela cut its beavy crude oil

Venezuela announced on Thursday an average price cut of \$1.78 a barrel for its heavy. extra-heavy and medium crudes, of which it exports 690,000 barrels a day.

Mr. Azpurua said that Vene-zuela had saved \$315 million from lower interest rates on its \$34-billion foreign debt in the first half of the year. He esti-mated another \$300 million could be saved in the second half if interest rates did not rise.

The oil price cuts came amid pressure from Venezuela's com-

U.S. Economy Seen as Weak in July

NEW YORK -The U.S. economy remained weak in July, with production falling to its lowest level since the start of the present recovery in December 1982, a nationwide survey of purchasing managers said Sunday.

For the sixth consecutive month, new orders and inventory levels were unchanged and no items were reported in short supply, the Na-tional Association of Purchasing Management said in its monthly report based on a survey of 250 industrial companies. "The problems in the economy

continue. Every key indicator except unemployment confirms an underlying weakness," said Robert J. Bretz, chairman of the survey committee and director of purchasing for Pitney Bowes Inc. The group's composite index

rose fractionally to 46.8 percent from 46.7 percent in June - its sixth consecutive month under 50 percent, the report said. A reading below 50 percent indicates the economy is declining; a ders are slow.

UPI Agrees to Withdraw Request Stage Decline To Cancel Its Contract With Union

By Nell Henderson

Weshington Post Service
WASHINGTON — United
Press International has reached an agreement with its employees' union that reduces the chances of a strike while the news service reorganizes under Chapter 11 of the U.S. Bankruptcy Code. UPI agreed Friday to withdraw

its petition to federal bankruptcy court asking for permission to void the union contract, a federal mediator said at a hearing before Judge

The market was also weighed down Friday by concern over the heavy supply of new government

U.S. CREDIT MARKETS

issues that will be pouring into the market this week. The Treasury holds the first of its quarterly refunding auctions on Tuesday.

Judge Bason appointed Mr. Mcfunding auctions on Tuesday.

Mahon to conduct further media-tions between the two sides, which the judge thanked for withdrawing "from the precipice of a potentially disastrous conflict to work together for the benefit of all."

Mr. McMahon announced the agreement after several hours of negotiations between both parties, which disagree over the need for further labor concessions to save UPI. The company and the mion plan to begin formal meetings Aug. 14. Mr. McMahon said, adding that no deadline had been set for resolving the dispute. The current contract expires in April 1986 and will remain in force during negotia-

ment argues that it must cut labor costs to continue attract buyers. The company asked

tions, he said.

the court to reject the contract after the union refused to accept proposed concessions, including delays in restoring previous wage cuts contributions and severance enti-

The company said the concessions would save \$1.5 million, assuring a 1985 profit of \$2 million to \$3.3 million. Without the conces sions, the company may end the year with a loss, UPI management

The union complained that breaking the contract would scare away potential buyers and vowed to "vigorously" challenge the company in court. The union executive committee had asked its members to authorize a strike in the event making an operating profit and to that Judge Bason terminated the

Doyle Dane Buys Agency Las Angeles Times Servis

LOS ANGELES — Doyle Dane Bernbach Group, a New York-based advertising agency. has announced the acquisition of York-Alpera Inc. of Los Angeles. The terms of the purchase were not disclosed.

York-Alpern specializes in campaigns for health-care con-cerns, aimed particularly at women. Doyle Dane Bernbach, with 1984 revenue of \$213.2 million and net income of \$8.7 million, spent much of 1984 reviewing its operations after two big clients, Atari and Polaroid, hdrew their accounts.

That review, in part, involved a focus on bolstering Doyle Dane's health-advertising specialty business.

Intergroup Agrees to Buy Permian

LOS ANGELES - National Intergroup Inc. says it has agreed to buy Permian Corp., a crude oil transportation company based in Houston, for \$172 million.

The announcement was made Friday, less than 24 hours after Ford Motor Co. said it would purchase a National Intergroup sub-sidiary, First Nationwide Financial Corp., for \$493 million. National Intergroup is a holding company based in Pittsburgh.

The majority owner of Permian the government's release of its is Wesray Capital Corp., whose monthly unemployment report. chairman and principal sharehold-Traders, who have been hoping for er is William E. Boston Ponders Economic Life After the Computer

(Continued from Page 7)

strong dollar is reducing computer was the decision by the major com-sales to other countries. Large puter companies to expand their manufacturing companies, some of the largest buyers of computer products, have reduced capital spending. And many potential customers are confused by the large variety of computers on the mar-

"Nobody knows whether the problem is endemic, or whether some macroeconomic force is at work," said Jim P. Manzi, president of Lotus Development Corp., the largest U.S. manufacturer of software for personal computers. which is based in Boston. Although Lotus has not laid off any workers, Mr. Manzi said the company's hir-

ing had been sharply reduced. In addition to the layoffs at Data General, Wang has reduced its payroll by 1.000 workers. Taradyne, Honeywell Inc., Computervision Corp., GCA Corp. and National Semiconductor Corp. —all makers of computer equipment that are based here or have plants near Boston - have also announced layoffs

this year. Executives say they do not know how long the downturn will last.
"Maybe the economy will pick up and everybody will come back leaner than they were before." Mr. Wang said. "Maybe the slump will he extended."

Companies making computing and electronic office equipment more than doubled their employment in the Boston area over the last decade, to 58,900 in 1984, from

27,900 in 1975. The emergence of the Boston area as a computer manufacturing center has its roots in the 1950s. when companies such as Wang and Digital Equipment Corp., now the area's largest computer company, were formed in the suburbs north and west of Boston. During the 1970s, greater Boston became home to more than than 900 hightechnology companies, most of them related to the computer in-

IMF Warns Egypt on Debt

However, after Mr. Mubarak's visit, the administration did agree to add \$500 million in emergency aid to the more than \$2.3 billion in military and economic aid the United States will provide to Egypt

but analysts had suggested that Genstar did not have chough finan-cial backing to do it. Genstar said, however, that it had fully committed bank loans to finance the offer. Genstar said it planned to propose amalgamating Canada Trustee, of London, Ontario, with another subsidiary acquired in 1981, Canada Permanent Mort-

gage Co. of Toronto.

The company said it has, through Canada Permanent, established a strong presence in the financial services industry. "We believe that furnire interaction between Canada Permanent and Canada Trustco could create an outstanding financial institution with world-class capabilities." Genstar's president. Ross Turner.

(Continued from Page 7) similar requests from other debtor

Bankers in Cairo expressed con-

cern last week that Egypt's finan-cial situation seemed to be entering a dangerous phase because of mounting deficits on visible trade and on current account, which includes trade in goods and non-merchandise items; an over-reliance on foreign aid, and a failure to carry out basic structural reforms.

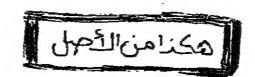

This view is reflected in the IMF report, which projects that exports will be "virtually stagnant," in large part because of the drop in the price of oil, one of Egypt's most important sources of foreign currency.

The IMF document implicitly blames Mr. Mubarak's original economic advisers, many of whom have been replaced

By Stuart Diamond New York Times Service NEW YORK - Lawyers in-

volved in Manville Corp.'s proposal to set up a trust to pay asbestos victims say the prospects for final approval are good.

After grappling 15 years with thousands of asbestos-related claims, Manville Friday offered to pay victims \$2.5 billion in the largest health-related settlement proposal ever made by a U.S. compa-

The offer calls for Manville to set up a fund to which shareholders would surrender half the value of their stock and the company would give up much of its earnings for 25

The offer, approved Friday by the board of directors, must now be approved by stockholders, unsecured creditors, co-defendants and health claimants, as well as federal bankruptcy court.
Robert J. Rosenberg, a lawyer

and the court-appointed representative for all present aspestos victims, said of the Manville proposal, "I like the financial terms very much and I think the committees

will go for it."

He said that the biggest objection would be from stockholders, but that bankruptcy law provided for approval of a reorganization plan even if one class objected.

Approval would allow Manville to emerge from bankruptcy pro-ceedings, which it initiated on Aug. 27, 1982, after about 16,500 law-

REX MORGAN

BOUND OVER: Indentured Servitude and American Conscience

By John van der Zee. 382 pages. \$18.95. Simon & Schuster, 1230 Avenue of the Americas, New York, N. Y. 10020.

Reviewed by Herbert Mitgang

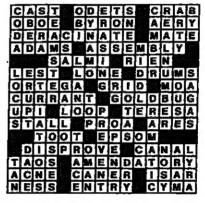

biography, "they are a race of convicts, and ought to be thankful for anything we allow them short of hanging." The accross doctor, referring the American colonists, was not simply expressing the mother country's contempt for the revolutionaries; his remark contained more than a shred of truth.

Some historians believe that nearly half of the early white settlers in the New World came involuntarily, as indentured servants or labor-ers who had to work for between four and seven years before they were set free from their bonds and contracts. A number of their tales can be found in John van der Zee's "Bound Over." In effect they became "white slaves"—bought and sold apprentices, tenants, homeless men and women shanghaied by shipowners, and convicts whose price for partial freedom was banishment, sometimes still in chains, to

This interpretation is not found in the standard schoolbooks, where the impression is gen-erally left that the colonists were a noble form of the human race, who came to America to seek political and religious freedom. Many did, but not everyone made the perilous trans-Atlantic crossing carrying a copy of Locke and Montesquien in his baggage. Like the later waves of immigrants in the 19th and 20th centuries, the colonists did not conform to the distorted image created in modern times by the Sons and Daughters of the American Revolu-

The indentured whites worked side by side with the slaves from Africa. Often, when the whites served out their contracts, they were replaced by blacks. As late as 1824, an advertisement ran in the Raleigh Gazette in North Carolina offering a \$10 reward for the return of

Solution to Friday's Puzzle

two white "apprentice boys, legally bound," who had run away from their master, a tailor. The blacks were considered more valuable than whites because, as property, they could be traded without ever being freed.

The surprising difference in value and treatment between indentured whites and black slaves appears in an account written two years before the Declaration of Independence by William Eddis in his "Letters From America." He observed:

Negroes being a property for life, the death of slaves, in the prime of youth or strength, is a material loss to the proprietor: they are, therefore, in almost every instance, under more comfortable circumstances than the miserable European, over whom the rigid planter exercises an inflexible severity. They are strained to the utmost to perform their allotted labour; and, from a prepossession in many cases too justly founded, they are supposed to be receiving only the just reward which is due to repeated offences. There are doubtless many exceptions to this observation, yet, generally

speaking, they groan beneath a worse than Egyptian bondage."

Van der Zee's book includes case histories of craftsmen, ne'er-do-wells, adventurers and convicts who undertook some form of involuntary labor in the New World. The subject has been bondled before and with greater relebeen handled before, and with greater relevance to other stirrings in the Colonial period, by such professional historians as Abboit E. Smith, author of "Colonists in Boadage," Ed-mind S. Morgan in "American Slavery, Amer-ican Freedom," and Richard B. Morris, "Gov-ernment and Labor in Early America."

The stories reveal the resiliency of the white bondsmen who survived under the contract instead of the lash. One concerns a boy named Peter Williamson. While playing on a quay in Aberdeen in 1743, he was entired to board a ship. Press gangs working for Scottish mer-chants roamed the streets seizing boys who might be "fit subjects for the slave trade." After nearly three months at sea, Williamson and other boys were sold in Philadelphia. He was bought for a seven-year term, found a kindly master, worked off his bondage, then married the daughter of a prosperous planter. Then came new troubles — capture and tor-ture, first by Indians and then by the French. When he made his way back to Aberdeen, he was arraigned before the magistrates and charged with libel and slander for printing material that reflected adversely upon "the characters and reputations" of the merchants who had kidnapped him.

It was not lost upon the framers of the revolutionary new government that the lan-guage of rebellion and independence contra-dicted the everyday practice of indentured servitude in the most prosperous colonies. The words of Thomas Paine in "The Rights of Man" and in "The American Crisis" fired dreams of freedom in the minds of the indentured classes. It would take a civil war before "neither slavery nor involuntary servitude" were written into the 13th Amendment to the

In Case of a Strike, Baseball's Fans Can Be Counted as Part of the Cost

By Thomas Boswell Vashington Past Service

WASHINGTON — Ballard of the stakes in these labor talks: smith, president of the San Diego Padres baseball term, has had a clubbouse meeting with his bank book and he has figured out what a strike would mean to him and his we'll settle it sometime. This win-

"The worst-case scenario is if the games and it wipes out the rest of the year, including the World Series, be said.

On the players' side, too, there are weeks of reason. Scott McGregor, player representation. strike starts after next Monday's

strike, if we stay in the pennant race and draw 2.5 million as we expect, we'll end up with \$5 million in the bank. I'm not saying 'profit.' Let's leave bookkeeping out of it.
Just say it's an \$8 million swing.

"Our players would lose be the truth." 52,949,000 in pay if the whole sea-

Multiply that by 26 major league teams and you have a guessimate of the stakes in these labor talks:

ter, next spring. So, if we're going to agree eventually, why not do it

gor, player representative of the Baltimore Orioles, says he thinks "If that happens, we'd owe players already are overpaid and somebody \$3 million. If we don't that they should be more concerned about the game's health. Whether or not we strike depends on how much we want to play the game. Do we still care about the be, "I'm optimistic." Everyone was sport or is it just money now? Is that all it is? That could very well

Smith's common sense is so obvious, McGregor's magnanimity is so So, a strike would cost the Pa-refreshing, that it is both confusing dies' players and owners nearly \$11 and irritating to realize how close baseball is to a strike that could

Negotiations Broken Off; 2 Days Left Before Deadline

NEW YORK - Negotiators for major league baseball players and the team owners, facing a strike deadline on Tuesday, broke offnegotiations Sunday, just a few hours after the commissioner, Peter Ueberroth, predicted they would settle on a new collective bargaining agreement without a walkout.

The negotiations were ended after owners rejected a union offer to lower its pension demands if management would agree not to after the salary arbitration system, said the acting director of the Major League Players Association leader, Donald Fehr.

Lee MacPhail, president of the owners' Player Relations Commit-

make the fiasco of 1981 seem tepid, been so inundated with money.

This uses a mantra seemed to make everybody in-This week's mantra seemed to voived filthy rich.

The players' association's one saying it but no one could give one reason why they were optimistic. The optimism is not a product of point of inflexibility is in the openmarket system of free-agentry and fact," said Don Fehr, acting head arbitration that the union has fought for and won, fair and

What is most infuriating about baseball's impasse is that it is total- would be that the players would ly unnecessary. The game never has give that up," Fehr said.

The meeting then ended and no new talks were scheduled, although

Fehr said the two sides would stay in touch.

After an unsuccessful meeting Saturday, MacPhail said that "neither side moved" on the major issues blocking an agreement: the owners' contribution to player pension fund and management's request for player concessions in salary arburation. While he characterized the situation as a temporary stalemate, he said he was convinced that both sides still were "searching for some new ap-

"There's finally a proposal except the issue of network dollars. on the table that both sides agree to in theory. Now it's a matter of putting the right [dollar] figures in the slots."

If the union will move off it's written-in-stone 33 percent, then one new factor, there is a way to talk turkey. The Four years ag \$60 million ought to be enough to settle a strike.

The bottom line is that if the free market mechanism of free agency and arbitration is left in place, then the percentage of network TV money barely matters, Why? Because if the marketplace works, the players will end up with all the available money, anyway.

The owners' problem is that they have used much of that TV money to sign players to long-term contracts. If the union gets the whole \$60 million a year, the clubs will, in a sense, have to pay twice.

And the union needs to say, "Okay, what will you give us, \$50 million? Do we hear \$40 million?

Speak up."

Both sides should be aware of

there is a way to talk turkey. The difference between \$15 million and wrung their hands with worry about the game.

Now, that patience and concern have been worn down to nothing. One fan protest group, called "Strike Back," has vowed that its members will boycott the parks for as many days after the strike as the

Becker Wins Last Match, West Germany Beats U.S.

HAMBURG — West Germany or four months ago that we would knocked the United States out of the Davis Cup world zone tennis the Davis Cup world zone tennis "Backer said" quarterfinals Sunday when Wim-bledon champion Botis Becker defeated Aaron Krickstein in straight

sets of the final match.

Becker, 17, who stanned the tennis world this summer by winning the Wimbledon title, best Krickstein, 6-2, 6-2, 6-1, to give West Germany a 3-2 victory — its first over the Americans in the six times their Davis Cup teams have met since 1913. Their last meeting was in 1970, when the United States triumphed, 5-0, in Ohio.

Dodgers' Welch Foils Reds on 2-Hitter

Compiled by that Staff From Dispatches CINCINNATI - Bob Welch pitched a two-hitter and Mike Scioscia and Pedro Guerrero hit home runs Saturday night as the Los Angeles Dodgers beat the Cincinnati Reds, 2-0.

one-third stuff written down?

Tuesday, the owners finally of-

Welch, 7-1, struck out five and walked three on route to his fourth complete game. The right-hander has won six straight decisions, allowing seven earned runs in the process. The Dodgers have won nine of their last 12 games.

Mario Soto was the loser despite allowing only four hits. He walked one and struck out seven.

Cincinnati's player-manager, Pete Rose, went hitless in four atbuts. He still needs 25 hits to break Ty Cobb's record of 4,191.

Scioscia gave the Dodgers a 1-0 lead in the fifth, homering over the right-field fence; he now has five homers, tying his career high for a season. Guerrero hit his 26th with two outs in the ninth.

Cincinnati did not get its first hit until there was one out in the fifth, when Dave Concepcion singled. Then Eddie Milner doubled with two outs in the sixth.

The Reds got one runner to third. In the second, Buddy Bell and Nick Esasky walked and Bell moved to third on a double play. Welch then snared Ron Oester's line drive to end the inning.

Mets 5, Cubs 4: In Chicago, Howard Johnson's two-out homer in the top of the 10th rallied New York, after the Mets tied the game Backman beat out an infield single and scored on Keith Hernandez's double down the right field line.

Expos 6, Pirates 5: Mike Fitzger-ald drove in two runs and Hubie Brooks hit a solo home run for Montreal in Pittsburgh, Jeff Reardon got two outs in the ninth for his 27th save, most in the majors.

in the AL East to 912 games over Butler went 4-for-4 in a 16-hit at-New York, It was the Rangers' fifth tack in Cleveland that backed newconsecutive loss.

Lump, 7-0, entered with one out left with a blister on his left index finger. The right-hander scattered three singles, struck out two and walked one. Bill Caudill, the fifth Toronto pitcher, worked two innings for his 14th save.
The Blue Jays had 11 hits, each

starter getting at least one. Tigers 9, Brewers 3: Lance Par-

rish drove in three runs with two homers in Detroit and Kirk Gibson and Darrell Evans each homered with the bases empty to help beat Milwaukee. Dan Petry, 12-10, won for just the fourth time in his last 12 risions, while Danny Darwin, 6-13, got his ninth straight defeat. Yankees 8, White Sox 4: In New

York, rookie Dan Pasqua highlighted a four-run first inning against Chicago with a two-run homer, and Ron Hassey followed run of his career.

ly-acquired Curt Wardle in his first major-league start. Floyd Rayford in the third after starter Jimmy Key and Mike Young homered for Baltimore. Mike Boddicker lost for the 11th time in his last 15 decisions.

Mariners 6, A's 2: Gorman Thomas hit his 24th homer and Mike Moore pitched a seven-hitter Moore, 10-6, won his sixth game in eight decisions since coming off the disabled list June 21.

Red Sox 5, Royals 4: In Kansas City, Missouri, Bill Buckner hit a three-run homer for Boston and Roger Clemens returned from the disabled list to post his first victory since May 27. Clemens, who carried a no-hitter into the fifth, was replaced in the sixth by Steve Crawford. The Royals had lost only once in their last 10 games.

Angels 5, Twins 4: In Anaheim, California, Doug DeCinces hit a two-run homer off Minnesota's Bert Blyleven in the ninth to rally the Angels. California's Rod Carew got a single in the game, leaving him one hit shy of becoming the

Tanana Pitches 1-Hitter for Tigers

DETROIT — Pitching master-fully with his curve ball, Frank Tanana allowed only one hit, Ben Oglivie's home run in the fifth inning, to give the Tigers a 4-1 victory Friday night over the Milwaukee

"When you throw the stuff I throw, you have to be sharp," Tan-

Tanana faced one batter over the minimum, Oglivie, and struck out eight. He walked one batter, but he was taken off the bases when Oglivie grounded into a double play.

'He's way ahead of everybody else," said the Tigers' manager, Sparky Anderson. "He knows how to pitch. Every pitch is for the next pitch or the pitch after."

Tanana, acquired earlier this year from Texas, made his only mistake when Oglivie hit a 2-1 pitch into the upper deck in right, his seventh home run, tying the

score at 1-1 in the fifth "If we were playing better, he could be 7-1," Anderson said.

Detroit, Tanana is 4-3 with a 2.33.

earned-run average. His record is 6-

Blue Jays 5, Rangers 3: George Bell's grand slam home run and

Rance Mulliniks's solo shot beat

Orioles 8, Indians 6: In Cleveland, Cal Ripken doubled home the

tying run for Baltimore, and scored the winning run on Eddie Murray's

single in the seventh inning. Rip-ken got three of the Orioles' 16 hits.

Smith's one-out, bases-loaded sin-

gle in the 10th beat Boston in Kan-

Dane lorg singled leading off the 10th and Jim Sundberg bunted Sheridan to second. After Mark

Clear's wild pitch sent Sheridan to third, intentional walks were issued

to Jorge Orta and Willie Wilson

and Bob Stanley was summoned

from the bullpen, but Smith singled

sharply up the middle.
A's 3, Mariners 1: In Oakland,

three pitchers held Seattle to four

hits and Mike Davis hit his 20th

homer. Rick Langford, who

pitched three scoreless innings after taking over in the third inning

for the injured Tommy John, was

credited with his first victory since

FRIDAY'S RESULTS SATURDAY'S RESULT

Yankees Slip Up, Are Doubled Up

United Press Int NEW YORK - The Yankees manager, Billy Martin, said he had never seen anything like it. He hopes he never will again.

In the seventh inning Friday night, with the Yankees' Bobby Meacham at second base and Dale Berra at first, Rickey Henderson

hit a drive over the center fielder's head. Meacham stumbled as he took off from second and Berra caught up with him as center fielder Luis Salazar threw to shortstop Ozzie Guillen, whose relay was right to catcher Carlton Fisk. Fisk caught both runners at the plate, for an 8-6-2-2 double play.

"At first I just wanted to catch the ball." Fisk said. "You think of those things when you know two guys are going to run into your face."

To make it worse for Martin, managing his first game since his lung
was pierced by an injection in Texas, Salazar's infield hit scored Guillen from second base with the winning run in the 11th inning. Salazar hit a grounder down the first base line that pitcher Rich Bordi fielded. Bordi had no play at first and Guillen never stopped

Tony Perez singled home Bell, then York's three-game winning streak. Bobby Castillo relieved and gave up a home run to Nick Esasky. pitched Los Angeles to victory. Cardinals 3, Phillies 2: Ozzie Smith's RBI single began a threerun seventh inning that beat Phila-

Yaphet Kotto: The Role-Winning Ways of a Hollywood Heavy

directed by veteran William Wyler in 1970 and a predecessor to the "blaxploitation" movie era

Will know who Yaphet Kotto [is, when I go around the block.

Q. What film would you attriof films such as "Shaft" and "Su- bute that to?

perfly" during the 1970s. Kotto broke into television act- past years. I've become some kind ing in the 1960s, appearing in "Bonanza," "Daniel Boone,"
"The High Chaparral," "Gunsmoke," "The Big Valley," "Mannix" and "Hawaii Five-O."

His provise that television action of an institution. It's like a build-up or a groundswell. Particularly the black kids, young people, and now more white kids than ever before.

His movie debut was at the age of 23 in "Nothing but a Man," (1964), directed by Michael Roemer, His first starring role was with Anthony Quinn in "Across 110th Street," (1972). Some of his "Alien," (1979) "The Star Chamber," (1983) "Brubaker," (1980) and "Blue Collar," (1978) and "Live and Let Die" (1973). He nette Kotto, and six children in Washington state.

Excepts from an interview: Q. Do you think you've opened doors for other black actors?

A: I don't know if I personally did it but it started in the late '60s Liberation of L. B. Jones" only to find out that there had never in motion-picture history been a black man to physically be aggressive toward white men on the screen, to the extreme of actually killing someone in defense of his honor. After that picture proved to be a success, a whole rash of what they called blaxploitation came out. Even though it was a class picture, people saw that

there was money in what I did. Until "Live and Let Die" I don't think any black actors had been used in an adventurous kind of manner. Prior to "Alien," people were saying how come they didn't use black actors in space pictures? "Alien" made over \$200 million. Then a rash of black acting? space films. For some reason I've been at the forefront of a move- York to Boston, to the Cape,

WASHINGTON — Yaphet
Kotto, 43, has been a screen
beavy ever since he was the first black major character to kill a isn't true at all. Walking down the Caucasian. The movie was "The street in any given American city Liberation of Lord Byron Jones." or any city in the world, people

A: It's a buildup of films over

Q. Have you lost friendships with other blacks if they don't think you're acting the way they should?

A: Painfully, yes, I must say. Some very heavy-named people, more notable roles were in too. But I don't really keep on an "Alien," (1979) "The Star Chamindividual cross. Nobody's out there paying my rent but me and bringing up my children but me. I have only one thing to do, man, that's to be a father to my children also played a memorable performance as Idi Amin in the TV and an actor. And because I do special "Raid on Entebbe" (1977). not have the right ethnic sound, He lives with his wife, Antoi-ette Kotto, and six children in even a problem of people trying to push cocaine, marijuana on me in Hollywood. I won't get involved with it. I think I'm an oddball all the way around. I've been an odd-ball ever since I was a kid. This name, Yaphet Kotto, which is when everyone was very political- mine, not made up. That always ly aware. I did a film called "The put me on the outs in my neighborhood.

> Q. Where did you grow up? A: In New York City, where everybody else was being half-Indian and half-Mohawk and all the

Q. So you're first-generation

A: Yeah. My mother and her family came from Panama, and my father is African; he came from the Cameroon. He worked in construction. My grandparents brought me up. My mother was a second lieutenant in the United States Army. She had me for a

Q. How did you break in to

A: I was taken to upstate New

where a gentleman discovered me. started spending my summers soing to the theater. I went to off-Broadway in New York and did a couple of Broadway shows. Finaliy, I got on a Greyhound bus, took
me for three days and nights to
California and the rest is history.
I'm about 23. I got into a play out
there, got noticed, got cast from
the stage into a number of guest

Q. Were the roles satisfactory? Weren't you always being the guy

Actor Kotto: "I'm an oddbali all the way around."

shot. I played incredible roles.

They would create roles that were

certain kind of role, a straight of black people going by scratch-laced black guy. I've been allowed ing their head and taking it and I to play black guys who were just swore when I was 19 I would nevequal. It has to be God. And it's er do that on the screen. I would continuing. The drum hasn't always stand up tall and straight I stopped beating.

from Cameroon?

A: Right And his friends were all over Africa. He spoke about 9 or 10 languages and so did all of his friends. When I was a kid, there were thousands of languages going on and all different colors of people. People who look like you, people who like me, people who look like brown, all these different races. That was very confusing. As l got older, an eastern mysticism brought me back to Christianity. But my life has never been one apart from God.

Q. What did your father do in

A: He was a merchant marine. I'm proud of that. I have become a cultural thing in the black com-munity in terms of my last name and African heritage. These kids who don't have that, whose parents came from slavery. I am looked at as an oddity. With all this publicity about blacks not how you are doing it!" I can't even handle my mail anymore.

about this, man, but I never really believed it till it happened. I knew fans would come, but not fans of this serious nature. They're not

saying, "Send me an autographed picture with your name on it."
They are saying, "Tell me how you did it. Should I stay in school?" asking about drugs. All because of not typical black roles. On "Bo-nanza" I played a horse thief. A thief and a gynslinger. I had to believe the role was written for a white gny. I loved it because I role was a carrying on going crazy. I get calls white gny. I loved it because I the country Terres. Georgie askplayed a real five cowboy. Not a the country, Texas, Georgia, ask-black leaders who were saying I

Q. Were the roles satisfactory?

A: I was never the guy who was

A: I was neve

was not going to leave an image of people to feel ashamed of. I swore that when I was a black Jew held that. I've upheld that in every single film I've done. I have never bowed my head down and I refused for a long time to do comedies, man, because I'm not going sit and make the white people laugh. I remember William Wyler coming to me and asking me to cry in "The Liberation of Lord Byron Jones." Before [I threw] this gny into the thresher he wanted me to cry. Just a year before Sidney Poitier had slapped some

dude in his face and everybody went, aaeehhhhohhhhhh! And

here I'm getting ready to throw a guy in a threshing machine.

Q. And would cry afterwards?
A: I would cry before. There was this image of what black men were supposed to be. A black man. Do you realize this, when you look at me on the screen it is a black man standing up there. Upon the screen, finally after all these centuries and years and the getting jobs in Hollywood, they all say to me, "Wait a minute, look at that Yaphet Kotto. Come tell us Brando and Al Pacino and all the rest of those dudes in a quiet, dignified way. I realized that when Q. How many letters do you get the guys came to me and say, cry, and I say, I can't do it. I said no.

A: In a month I get about 2,200

I'm playing a guy that's out for revenge. People who are out for revenge don't cry before they commit their act.

Q. So you didn't do it in the end? A: No, I didn't cry. I wouldn't. He understood. I explained it to him. William Wyler, God rest his soul, being the kind of man he is said, "Let's go with it. You're right." I had to pick my time to fight this battle. People say, "You who they see I am. They don't see know, he don't take no stands." Look, I took a stand. Those people were getting ready to fire me, man. And those black actors and played a real rive cowboy. Not a cowboy with black problems who were saying 1 haven't done anything. Who took was a slave or anything but a gunslinger and Hoss was trying to person is it kind of violent?

A Observation was trying to person in the person in the person in the person is it will be person in the talk me into putting my gun away.

A: Oh man, crazy, especially and put them into school, so that
We were both two white actors. I black people, black women. I'm they could study and they are now

LANGUAGE

Medical Terminology

By William Safire

what a colon was, you would proba-bly get this answer: "one dot above another, the punctuation mark following to wit," or, if you asked any good pedant, "grammatical discon-tinuity more prolonged than that marked by a semicolon but not as complete as that indicated by a

Since President Ronald Reagan's operation, however, the first meaning that comes to everyone's mind is "the large intestine, from the cecum to the rectum."

The root of both, kolon, is a transliteration of ancient Greek. With no mark over the first o, the word means "food, meat, or the place in the belly where it goes", with a mark over the first syllable. however, the meaning becomes "limb, member, portion," which took Greek grammarians into using kolon for independent clauses and then applying that word to the mark between some clauses. Now to a word that used to be

whispered, and even now is often spoken with dread: cancer. The surgeon who briefed the press after the operation at Bethesda Naval Hos-pital opened with a matter-of-fact stunner: "The president has can-cer." In that sense, the word denotes a disease marked by growth of malignant cells. When laymen ask surgeons, "Did you get it all out?" the implication is that cancer -a cancer - can be removed, and the patient thus cured. Many cancer specialists (who call themselves oncologists, from the Greek ankas, "mass," for the branch of medicine dealing with tomors) think of cancer as a continuing threat that can be arrested; they hesitate to use the word cured, preferring remission, or, to remove that term's connotation of temporariness, permanent

Strictly speaking, an oncologist is a tumor specialist, not a cancer specialist, because not all tumors are cancerous. A tumor may be benign or malignant; although the adjectives benignant and malign ex-ist, and you would think that parailel construction would call for benign vs. malign, that's not the way the language goes in this case.

Cancer is the Latin and Greek

word for "crab"; the disease, ac-cording to the Greek physician Ga-

of the swollen veins surrounding a tumor to the legs of a crab. (Canker WASHINGTON — A month tumor to the legs of a crab. (Canker has the same origin, but came to mean "ulcer.") The fourth sign of mean "ulcer.") The fourth sign of the zodiac is named Cancer for a constellation supposedly shaped like a crab. "Since the 1960s." says Sol Steinmetz of Barahart Books, "many people born under that sign have not wanted the ominous con-notation of the disease and refer to themselves as moon children because of the supposed influence of the moon on the house of Cancer."

Polyp, the name for the type of tumor in the president's colon, comes from "many-footed," named for the shape projecting from the membrane. (Wags promptly called Reagan's Cabinet "the Polyp-buro.")

The most worrisome word in this vocabulary is metastastice. Greek for to change from one place to another": in cancer, such metastasis takes place if cancer cells are transferred from a tumor through the bloodstream to other parts of the body.

"He's champing at the bu," said the White House spokesman during Reagan's hospital stay, indicating a healthy desire to get back to work; the phrase was quoted in The New York Times headline.

To champ means "to munch. chew vigorously, bite down on something hard. The first applica-tion to a horse was in Thomas Phaer's 1558 translation of Virgil's "Aencid": "The palirey on the fomy bit of gold with teeth he champes." William Makepeace Thackeray, in 1852, immortalized Horses . . . champing at the

On the newscasts I was monitoring, that verb was pronounced chomping. In Britain champ is standard and chomp is dialect: in the United States, champ is less ofter used to describe chewing that chomp, a Southernism frequently employed by the cartoonist A Capp in his "Li'l Abner" strip Thus, to spell it champing at the oil when most people would say champing at the bit is to slavishly follow outdated dictionary preferences. The word is imitative, so it should imitate the sound that most people use to imitate loud chewing Chew that over, lexicographer
